PRELIMINARY STATEMENT

- 1.1 The Matanuska Telephone Association, Inc. hereinafter referred to as "the Utility," furnishes exchange telephone service, private line service and channels throughout the territory served by it as shown in its schedules, which include a description of the services furnished, and maps filed herewith. All services provided by the Utility, except where expressly provided in the tariff schedules herein, are solely for the lawful use of the Utility's subscribers and their employees, guest and families
- 1.2 Connection for toll telephone service is maintained with the lines of connecting companies, whereby the toll service of such companies is made available to subscribers and patrons of the Utility at the regular published rates of the connecting toll companies.
- 1.3 No officer, solicitor, agent, or employee of the Utility has the authority to waive, alter, or amend in any respect these rates and rules or any part thereof or to make any arrangements inconsistent therewith.
- 1.4 Reserved for Future Use

Title: Chief Executive Officer

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS

- 2.1 For the purpose of these tariff schedules the terms and expressions listed below shall have the meanings set forth opposite them.
- 2.2 ACCESS LINE – That facility that connects the serving central office with the subscriber's premise. The point of connection at the subscriber's premise is normally the protector.
- 2.3 ACTUAL COST - Actual cost refers to the cost of materials plus the rate per hour at the Utility's construction labor rate, including charges for supervision and other overhead charges.
- 2.3.1 ADDITIONAL CALL OFFERING – Provides ISDN BRI user with an established dual B-channel call, to originate an outgoing voice call. Originating or receiving a voice call will cause one B-channel to drop off for the duration of the call and to re-establish itself upon termination of the call. (N) (L)
- 2.3.2 ADDITIONAL FUNCTIONAL CALL – Provides an ISDN BRI user, with an established dual B-channel call, to originate an outgoing voice call. Originating or receiving a voice call will cause one B-channel to drop off for the duration of the call and to re-establish itself upon termination of the call. (N)
- 2.4 ADDITIONAL LISTING – Any listing of a name or other authorized information in connection with a customer's telephone number in addition to that to which he is entitled in connection with his regular service.
- 2.4.1 ALTERNATIVE VOICE/CIRCUIT SWITCHED DATA – Provides the ability to originate and receive either Circuit Switched Voice or Circuit Switched Data calls over a single B-channel, but not simultaneously (N) (L)

L - Anonymous Caller Reject, Apparatus, Applicant, Association, and Battery Power definitions originally on Sheet 47, see Original Sheet 47.1

Pursuant to U-99-16 (1)

Matanuska Telephone Association, Inc. 1740 S. Chugach Street Palmer, AK 99645			

DEFINITIONS

- 2.5 ANONYMOUS CALLER REJECT – An enhanced custom calling feature which allows subscribers with or without Caller I.D. to reject calls for which calling name/number has been intentionally blocked. Only calls for which the information has been blocked are rejected.
- 2.6 APPARATUS – Electrical or mechanical equipment in whole or in part provided the Utility in the provision of various services.
- 2.7 APPLICANT – The person making application to the Utility for service.
- 2.8 ASSOCIATION – The public utility named, herein, Matanuska Telephone Association, Inc. (see also Utility).
- 2.9 (D)
|
(D)
- 2.9.2 B (BEARER) CHANNEL – The B-channel carries circuit-switched voice and/or data communications at speeds up to 64 kbps from the customers premises, over the loop facility, to the central office.

DEFINITIONS (continued)

2.10 BURIED CABLE OR BURIED WIRE – A cable or wire designed for use in underground construction and utilized in extending the Utility's telephone plant. As used herein, buried refers to direct buried cable or wire as opposed to underground cable which refers to cable or wire in a conduit system.

2.101 BURST RATE – refers to the upper bandwidth limit a permanent virtual circuit is allowed to send its data through the Frame Relay Service (FRS) network. The burst rate is limited by the actual physical port access speed.

2.11 BUSINESS SERVICE – Exchange service furnished to individuals engaged in business, firms, partnerships, corporations, agencies, shops, works, tenants of office buildings, fraternal lodges, churches, clubs, other organizations of a similar nature and individuals practicing a profession or operating a business out of a residential dwelling. If the directory listing denotes the character of the service to be for business use, the rates for business service, (either basic or deluxe) will apply.

(C)

(C)

2.11.01 BUSINESS BASIC – is business service provided without any associated hunt group services.

(N)

2.11.02 BUSINESS DELUXE – is business service provided on a line basis, utilizing hunt group services, or on a trunk basis; either two-way or one-way.

(N)

Matanuska Telephone Association, Inc. 1740 S. Chugach Street Palmer, AK 99645			

DEFINITIONS (continued)

- 2.12 CALL BLOCK – An enhanced custom calling feature that allows subscribers to designate their number (and name where technically feasible) as private and prevent delivery to a party using Caller I.D.
- 2.13 CALL BLOCK – PER CALL – An enhanced custom calling feature inherent in basic residential and single line business service that allows a subscriber to dial a code and activate the Call Block feature on a call-by-call basis.
- 2.14 CALL BLOCK – PER LINE – The addition of Call Block (an enhanced custom calling feature) to a subscriber's line which prevents the delivery of calling number (and name where technically available) information for all calls made from the line.
- 2.14.1 CALL BY CALL SERVICE SELECTION – expands ISDN-PRI (Primary Rate Interface) by sharing the PRI trunk group, allowing for Foreign Exchange facilities, and Tie Trunks along with existing call types (Inward, Outward, or 2-Way) as needed. | (T)

Title: Director of Regulatory Affairs & Carrier Relations

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS (continued)

- 2.15 CALLER I.D. – An enhanced custom calling feature that allows a subscriber to view the telephone number and directory name (when available) of an incoming call before answering. After the first ring, the central office sends the name and telephone number of the calling party as well as the current month, day, hour and minute. Telephone name and number may not be available for all inter-office calls. Caller I.D. requires a telephone set or a separate display unit capable of recognizing and displaying the calling information sent from the central office.
- 2.16 CALLER I.D. WITH ANONYMOUS CALL REJECT – An enhanced custom calling feature that allows a subscriber with Caller I.D. to reject calls for which calling name/number display information has been intentionally blocked. Only calls for which the information has been blocked are rejected. Rejected calls are sent to an MTA announcement.
- 2.17 CASUAL ACCESS – An option available for certain enhanced custom calling features which allows the subscriber to activate the feature on a per-use rather than a monthly basis.
- 2.18 CENTRAL OFFICE – A telephone utility's switching office unit by means of which one telephone station may be connected to another.
- 2.181 CENTRAL OFFICE COIN SUPERVISION – provides central office coin services required by dumb payphones. The services include recognition of coin deposits and the ability to return coins to the payphone user. (N)
|
(N)
- 2.19 CENTRAL OFFICE LINE CONNECTION CHARGE – The service connection charge with covers (1) the administrative costs associated with the assignment of a telephone number and facilities and (2) the installation costs associated with Central Office wiring required for the provision of telephone service.
- 2.20 CHANNEL – A communications path between two or more points of termination.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS (continued)

- 2.21 CHANNEL TERMINATION – A Special Access rate element which recovers costs for terminating a dedicated circuit between a Customer Designated Premise (CDP) and a Customer Serving Wire Center (C-SWC). The Channel Termination charges includes a standard interface which provides technical characteristics for the service ordered.
- 2.22 CHANNEL MILEAGE TERMINATION – A Special Access rate element which recovers the cost for end office equipment associated with terminating the facility at the Serving Wire Centers of two CDPs.
- 2.23 CHANNEL MILEAGE FACILITY – A Special Access rate element which recovers the per mile cost for transmission facilities between the Serving Wire Centers associated with two CDPs and an exchange carrier hub or between two exchange carrier hub locations.
- 2.23.1 CIRCUIT SWITCHED DATA – Originates and receives switched data calls over a B-channel using the public switched network.
- 2.23.2 CIRCUIT SWITCHED VOICE – Originates and receives switched voice calls over a B-channel.
- 2.24 CUSTOMER DESIGNATED PREMISES (CDP) – The premises specified by the customer for the provision of private line service.
- 2.25 COMMISSION – The regulatory body of the State of Alaska, namely the Regulatory Commission of Alaska (RCA). | (T)

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS (continued)

- 2.251 COMMITTED INFORMATION RATE (CIR) – denotes the transmission speed specified by the customer at which the Frame Relay Service Network commits to transfer data between two ports. (L)
- 2.26 CONNECTING ARRANGEMENT – The equipment provided by the Utility to accomplish the direct electrical connection of customer provided facilities of the Utility or the direct electrical connection of the Utility's facilities (L)

L – Committed Information Rate and Connection Arrangement definitions originally on First Revised Sheet 50.

DEFINITIONS (continued)

(D)

(D)

2.28 CONTINUOUS REDIAL – An enhanced custom calling feature that, when activated, directs the central office to place a call to the telephone number of the last outgoing call from the subscriber's telephone. The central office will redial the telephone number whether or not the original call was answered, unanswered, or busy. If the redialed number is busy, the central office will monitor the status of that line for up to thirty minutes. When the line becomes available, the Continuous Redial subscriber will be signaled with a special ring. When the subscriber lifts the handset, the call will be automatically dialed.

2.29 CONTRACT – The service agreement between a customer and the Utility under which facilities of communication between specified locations, for designated periods, and for the use of the customer specifically named in the contract are furnished in accordance with the provisions of the tariff schedules.

Palmer, AK 99645

DEFINITIONS (continued)

- 2.30 CUSTOMER – The person in whose name service is furnished as evidenced by the signature on the application or contract for that service, or in the absence of a signed instrument, by the receipt and payment of bills regularly issued in his name regardless of the identity of the actual user of the service.
- 2.31 DATA ACCESS ARRANGEMENT – A protective connecting arrangement for use with the network control signaling unit.
- 2.32 DATE OF PRESENTATION – The date upon which a bill or notice is mailed or delivered to the customer.
- 2.32.1 D-CHANNEL – The D-channel carries signaling at speeds up to 16Kbps on ISDN-BRI (Basic Rate Interface). An ISDN-PRI (Primary Rate Interface) D Channel is a 64 kilobit per second (Kbps) channel that carries signaling and control for the B channels.
- 2.33 DEVICE – Electrical or mechanical equipment in whole or part provided by the Utility in the provision of various services.
- 2.34 DIAL TELEPHONE SERVICE – Service by means of a telephone system in which the central office equipment is of the automatic or machine-switching type and in which the customer's station telephone is equipped with a dial for use in originating calls therefrom.

DEFINITIONS (continued)

- 2.35 DIRECT ELECTRICAL CONNECTION – A physical connection of the electrical conductors in the communications path.
- 2.36 DIRECTORY LISTINGS – Essential information in the telephone directory whereby telephone users may ascertain the telephone number of a customer's station.
- 2.37 DISCONNECT – Discontinuance of service made at the request of the customer or at the option of the Utility for nonpayment of service or other reason; the facilities used in the disconnected service being made immediately available for use for another customer.
- 2.371 DUMB PAYPHONE – A payphone which requires coin service signaling from the central office which is provided by the central office coin supervision additive. (N)
|
(N)
- 2.38 EMERGENCY – A situation in which property or human life is in jeopardy and the prompt summoning of aid is essential.
- 2.39 EXCHANGE – A telephone system providing service within a specified area as shown on maps filed elsewhere in the tariff schedules and within which communications are considered as exchange messages, except those messages between toll points.
- 2.40 EXCHANGE AREA – An area shown on maps filed elsewhere in tariff schedules in which the Utility is authorized to furnish exchange telephone service from one or more central offices serving that area.
- 2.41 EXCHANGE MESSAGE – A completed telephone call or telephone communication between exchange stations in the same local service area except messages between toll points.
- 2.42 EXCHANGE SERVICE – Telephone service furnished between customers' telephone stations within an exchange area or local service area.

DEFINITIONS (continued)

- 2.43 EXTENDED AREA SERVICE – Exchange service available to customers in a particular exchange for communication throughout that exchange and other designated areas in accordance with the provisions of the tariff schedule.
- 2.45 FICTITIOUS NAME – A name or style employed by an individual or a concern to direct attention to a commodity or service or for any purpose other than the actual conduct of the business.
- 2.46 FLAT RATE SERVICE – Exchange service furnished at a fixed periodic charge.
- 2.47 FOREIGN EXCHANGE – In connection with foreign exchange service, that exchange in which is located the central office from which foreign exchange service is furnished.
- 2.48 FOREIGN EXCHANGE SERVICE – Exchange service furnished by means of facilities connecting a customer's station with a central office in an exchange area other than the exchange area in which the station is located, or extension service or PBX station service furnished in an exchange area other than that in which the primary station of PBX station is service is located.
- 2.49 FOREIGN PRIMARY LISTING – A listing in the Utility's telephone directory for a telephone number whose primary service is furnished by a different utility. The listing may appear in the white page and/or classified advertising (yellow page) section of the directory.

Palmer, AK 99645

DEFINITIONS (continued)

- 2.491 FRAME – denotes a group of data bits in a specific format, which enables network equipment to recognize the meaning and purpose of specific bits
- 2.492 FRAME RELAY PORT – denotes the physical location in the telephone company switching office where the special access facility of the customer connects to the Frame Relay Service Network. The Frame Relay Port receives the data frame from the end user's Local Area Network or other compatible customer premise equipment (CPE) device and verifies that the connection is valid before relaying the frame through the Frame Relay Network to the destination end point.
- 2.493 FRAME RELAY SERVICE – denotes a fast packet switching network that permits the transmission of data at speeds up to 1.536 Kbps using Permanent Virtual Circuits (PVCs).

DEFINITIONS (continued)

2.50 HUB – A telephone company designated serving wire center at which bridging or multiplexing functions are performed. The bridging functions are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth. NATIONAL EXCHANGE CARRIERS ASSOCIATION (NECA) Tariff, FCC No. 4 identifies serving wire centers, hub locations and the type of bridging or multiplexing functions available.

2.51 INDIVIDUAL CASE BASIS – A condition in which the rates and charges for an offering under the provisions of this tariff are developed based on the circumstance in each case.

2.52 INDIVIDUAL LINE SERVICE – Exchange service furnished by means of a central office line or circuit assigned for use to one primary station only.

2.53 INSTALLATION CHARGE – An initial, non-recurring charge made under certain conditions to cover the cost of installing telephone equipment. The payment of an installation charge gives the customer no ownership wholly or in part to the property installed.

2.53.1 INTEGRATED SERVICES DIGITAL NETWORK (ISDN) – BASIC RATE INTERFACE (BRI) – ISDN-BRI service provides a line-side connection that provides two B-channels and one D-channel (2B+D) per facility. The customer will receive two ISDN-B channels. Each BRI line can support two voice or data B-channel devices, such as a telephone set or personal computers. MTA's ISDN-BRI offering limits the D-channel to network signaling.

2.53.2 INTEGRATED SERVICES DIGITAL NETWORK (ISDN) – PRIMARY RATE INTERFACE (PRI) – ISDN-PRI service is configured in 23 B-channels plus one D-channel, or 24 B-channels when configured in a PRI serving arrangement.

- 2.56 LAST CALL RETURN – An enhanced custom calling feature which allows the subscriber to direct the central office to recall the telephone number of the last incoming call to his telephone. The subscriber can return a call without knowing the telephone number of the calling party. Customers who have requested that their number not be revealed under Call Block will be able to block the Last Call Return feature from activation
- 2.56.1 LIFELINE SERVICE – A retail local service offering that is available only to qualifying low income customers for which qualifying low income customers pay reduced charges as a result of application of the Lifeline support amount. Only one Lifeline service will be permitted per household. T
- 2.57 LINE EXTENSIONS – Line extensions consist of additions to plant from existing facilities to service connections and exclude additions to plant along existing telephone facilities. T
- 2.571 LINK UP SERVICE – An assistance program for qualifying low income customers which includes a reduction in the Company's customary charge for service connections for a single telecommunications connection to a customer's principal place of residence, and a deferred schedule of payment of the charges assessed for commencing service, for which the customer does not pay interest. T
- 2.57.2 LOCAL AREA NETWORK – denotes a network permitting the interconnection and intercommunication of a group of computers.

| (D)

2.86 SERVICE CONNECTION – Drop and block wiring or cable, including protective conduit where used, from the point of connection with the Utility's distribution facilities to the point of connection with the inside wiring at the premises served.

2.87 SERVICE ORDER CHARGE – The service connection charge which covers the cost of preparing, issuing and recording of a service order.

2.88 SERVING WIRE CENTER – The wire center at which the Customer Designated Premises would normally obtain dial tone from the Utility.

2.881 SMART PAYPHONE – A payphone which contains all the circuitry required to execute coin acceptance and related functions within the instrument itself and does not require coin service signaling from the central office.

(N)
|
(N)

2.89 SPECIAL ACCESS – Dedicated non-switched (private line) facilities between two or more CDPs.

2.90 SPECIAL BILL – A bill for accumulated exchange and toll service charges rendered in lieu of the requirement of a cash deposit for the re-establishment of credit before disconnection of service as provided for in the tariff schedules, or a bill for accumulated exchange and toll charges rendered at such time as the amount of unpaid charges, billed and unbilled, materially exceeds the amount of any prepaid charges or any deposits made in connection with the particular service.

RCA NO. 19	First Revised	Sheet No.	62
Canceling:	Original	Sheet No.	62
Matanuska Telephone Association, Inc. 1740 S. Chugach Street Palmer, AK 99645			

DEFINITIONS (continued)

- 2.91 SPECULATIVE PROJECTS – Projects involving oil wells, mining operations, stock or other promotional schemes, club membership or other drives, sales campaigns, resorts, business ventures when experience shows that they are of a type subject to frequent sale or in which the proprietor has only a minor financial interest, and other projects which present more than the usual liability of loss.
- 2.92 SUBSCRIBER – The person in whose name service is furnished as evidenced by the signature on the application or contract for that service, or in the absence of a signed instrument, by the receipt and payment of bills regularly issued in his name regardless of the identity of the actual user of the service. (See also Customer)
- 2.93 SUPERSEDURE – The transfer of a customer's complete service, including the telephone number, from one party to another with no change in type or location of the equipment or wiring and including the responsibility for payment of outstanding charges against the service.
- 2.94 TARIFF SHEET – An individual sheet of the tariff schedules.
- 2.941 TELECOMMUNICATIONS SERVICE PRIORITY – The Telecommunications Service Priority System (TSP) provides priority treatment for National Security Emergency Preparedness Services critical for maintaining a state of readiness or responding to and managing any event or crisis which causes or could cause harm to the population, damage to property, or a threat to the security of the United States. Priority treatment is provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's Rules and Regulations. (N)
- 2.95 TELECOMMUNICATIONS SERVICES – The provision of facilities permitting the conveying of information, signals or messages by wire, radio or other electromagnetic systems.
- 2.96 TEMPORARY DISCONNECT – A temporary discontinuation of service without complete termination of the service, made at the request of the customer or on the initiative of the Utility, in which the facilities and telephone number are held available for resumption of service.

Title: Manager, Regulatory Affairs

Name: Kenneth C. Bahr

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS (continued)

2.97 TEMPORARY SERVICE -

- A. Service to premises or enterprises, the temporary nature of which can be determined in advance from the known limited duration of the contemplated operations, such as construction or exploration projects with their related housing and miscellaneous camp service facilities, summer or winter resorts, amusement or sports concerns, fairs, exhibit structures or places and other enterprises of like limited duration.
- B. Service estimated to be for a term less than the normal location life to premises or enterprises normally permanent in nature.

2.98 TERMINATION CHARGE – A charge applied under certain conditions when a contract for service is terminated by the customer before the expiration of the minimum contract period. This charge shall apply solely to the specific service covered by the contract.

2.981 THROUGHPUT – Denotes the number of data bits successfully transferred in one direction per unit of time.

(D)
|
(D)

2.991 TOLL BLOCKING – A service that prevents the placement of all long distance calls for which the customer would be charged.

Tariff Advice 281-19

Title: Chief Executive Officer

Name: Greg Berberich

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

DEFINITIONS (continued)

- 3.0 TOLL MESSAGE – A completed telephone call or telephonic communication between exchange stations when the called station is not within the local service area of the calling station, between toll stations or between a toll station and an exchange station.
- 3.1 TRACT OR SUBDIVISION – Improved or unimproved land under a definite plan of development.
- 3.2 TRADE NAME – The name or style under which an individual or concern conducts its business and by which it is generally known to the public.
- 3.3 TRENCHING COSTS – Costs of excavating, backfilling and compacting, and where necessary, cost of breaking and repaving pavement and of restoring landscaping.
- 3.3.1 TRIBAL LANDS – Tribal Lands are defined as reservations as the term is defined in Subpart A of the regulations promulgated by the US Department of Interior's Bureau of Indian Affairs (BIA). Tribal Lands include any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) which is federally recognized as eligible by the US Government for the special programs and services provided by the Secretary of the Interior to Indians because of their status as Indians. The entire state of Alaska is regarded as a reservation under BIA definition and is therefore considered "Tribal Lands". As a result, the FCC's Order 00-208 regarding Enhanced Lifeline and Expanded Link Up applies to all financially eligible individuals within the State of Alaska.

DEFINITIONS (continued)

- 3.4 **TRUNK LINE** – A telephone circuit from one central office to another or between private branch exchange system services and a utility central office.
- 3.5 **UNDERGROUND SERVICE CONNECTION** – A customer's "drop" wire which is run underground from a pole line or an underground distribution cable.
- 3.6 **UNDERGROUND SUPPORTING STRUCTURE** – Conduit, handholes, pullboxes, manholes and other appurtenances related thereto, such as ladders, cable racks, etc. where and as required, plus trenching costs as defined herein.
- 3.7 **UTILITY** – The public utility named herein, Matanuska Telephone Association, Inc. See also Association.
- 3.8 **V & H COORDINATE METHOD** – A method of computing air miles between two points by utilizing an established formula which is based on the vertical and horizontal coordinates of the two points.
- 3.9 **WIDE AREA NETWORK (WAN)** – A data network typically extending a local area network outside the building, over local telephone company lines, to link to local area networks at other customer locations.

CENTREX DEFINITIONS

(N)

- 1.0 AUTODIAL – provides an automatic connection between a calling station that goes off-hook and a predetermined location.
- 1.1 AUTOMATIC LINE – provides an automatic connection between a calling station that goes off-hook and a predetermined location.
- 1.2 BUSY LAMP FIELD – allows a Meridian Business Set (MBS) user to monitor station status of a directory number (DN) through the use of MBS lamp states.
- 1.3 CALL FORWARD – allows a Centrex customer to have incoming calls to a station automatically forwarded to a predetermined telephone number.
- 1.4 CALL FORWARD BUSY LINE – forwards incoming calls to another (pre-designated) station number when the called number is busy.
- 1.5 CALL FORWARD DON'T ANSWER – forwards all incoming calls to another (pre-designated) telephone number if the called number is not answered after a specified number of rings.
- 1.6 CALL FORWARD GROUP DON'T ANSWER – allows a Centrex hunt group to redirect calls to a different destination if the calls are not answered within a pre-designated amount of time.
- 1.7 CALL FORWARDING OF CALL WAITING CALLS – forwards unanswered waiting calls to a station designated directory number. One incoming call at a time is given call waiting treatment before being forwarded; the second incoming call is given busy treatment.

CENTREX DEFINITIONS (continued)

(N)

- 1.8 CALL PARK – provides a station user with the capability to park a call against their directory number. The parked call may be retrieved from any Centrex station by first requesting Call Park retrieve and then dialing the directory number of the station against which the call was parked.
- 1.9 CALL PICK UP – allows a station to answer calls incoming to another Centrex station within a predetermined Call Pickup group. A Call Pickup group is a group of stations with Call Pickup assigned and which are linked together using one of the Centrex stations as a linking member.
- 1.10 CALL WAITING – provides an incoming call which encounters a busy Centrex telephone set with audible ringing, which the station user receives as call waiting notification. The called station user can either acknowledge the new caller and place the existing party on hold, or abandon one of the calls and be recalled by the other.
- 2.0 CALLER ID – provides the telephone number (and the directory name associated with that telephone number when it is available) of an incoming call before answering.
- 2.1 CALLER ID BLOCKING – when added to a Centrex station line, will prevent delivery of the telephone number (and name when available) to a called party using Caller ID, Calling Number Delivery or Calling Name Delivery.
- 2.2 CALLING NAME DELIVERY – displays the name associated with the incoming call.
- 2.3 CALLING NUMBER DELIVERY – displays the 10-digit directory number of the calling party.

CENTREX DEFINITIONS (continued)

(N)

- 2.4 CALLING NAME DELIVERY BLOCKING – (See Caller ID Blocking)
- 2.5 CALLING NUMBER DELIVERY BLOCKING (See Caller ID Blocking)
- 2.6 CALLING NAME DISPLAY – provides for calling name display within and between customer groups on the DMS-100 switch.
- 2.7 CONFERENCING – allows an attendant to establish a six-port conference call.
- 2.8 CONTINUOUS REDIAL – a Centrex user may direct the central office to place a call to the telephone number of the last outgoing call made from his/her telephone.
- 2.9 CUSTOM DIALING PLAN – allows group intercom capabilities. The customer can use abbreviated dialing (less than 7 digits) to dial an extension within his/her customer group.
- 2.10 CUSTOMER ORIGINATED TRACE – allows Centrex users to activate a trace of the last incoming call without requiring prior intervention by police.
- 3.0 CUT THROUGH DIALING – implements Cut-Through Dialing for Centrex sets, attendant consoles, trunks, Centrex Business Sets and data units.
- 3.1 DIRECTED CALL PARK 2500 MERIDIAN BUSINESS SET (MBS) – allows calls directed to a 2500 MBS to be received from any station by dialing an access code and the directory number against which the call is parked.

CENTREX DEFINITIONS (continued)

(N)

- 3.2 DIRECT INWARD SYSTEM ACCESS (DISA) – 3rd DIAL TONE – provides the option of providing DISA subscribers with immediate dial tone for entering designation digits.
- 3.3 DIRECT STATION SELECT (DSS) – this feature provides direct dialing to a monitored directory number.
- 3.4 DISTINCTIVE CALL WAITING TONES – if a Centrex user is engaged in conversation and a call from a designated directory number arrives, a distinctive call waiting tone (short-long-short) accompanies the incoming calls.
- 3.5 DISTINCTIVE RINGING PATTERNS – with this service, incoming calls can be automatically identified by distinctive ringing.
- 3.6 ENHANCED CALL FORWARD – allows attendants to activate, deactivate and program Call Forwarding for Centrex stations equipped with Call Forwarding Universal and Call Forward Intragroup
- 3.7 ENHANCED STATION MESSAGE DETAIL RECORDING (SMDR) – is a call detail recording system within the DMS-100 that records call information of Centrex calls placed by station users and Automatic Message Accounting records.
- 3.8 GROUP INTERCOM - enables a Centrex user to terminate on a member of a predesignated group by using abbreviated dialing.
- 3.9 HUNTING OPTIONS – See Section 3.1, Sheet 155 of this tariff.
- 3.10 INTRAGROUP CALLING – allows customer in different customer groups to call each other by using abbreviated dialing, in the same manner that callers in the same customer group can call each other by dialing from two to five digits.

CENTREX DEFINITIONS (continued)

- 4.0 LARGE MEET ME CONFERENCE (30) – provides a conference bridge and directory number for conferees to dial at a specified time to hold a conference.
- 4.1 LAST CALL RETURN – allows a Centrex user to direct the central office to recall the telephone number of the last incoming call to his/her telephone by dialing an activation code.
- 4.2 LAST NUMBER REDIAL – allows a Centrex user to redial the last number called by depressing a single key rather than redialing the entire number.
- 4.3 MERIDIAN BUSINESS SET (MBS) – is a telephone set available in various configurations, manufactured by Nortel, for use with Centrex service.
- 4.4 MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) – is a directory number that is assigned to more than one Centrex business set. The Centrex business sets that are assigned to this number are called a MADN group. MADN groups can be comprised of up to 32 Centrex business set stations, and can be configured in either a single call arrangement or a multiple call arrangement.
- 4.5 MADN (see above) – SINGLE CALL ARRANGEMENT – allows a MADN member to pick up or originate a call when the MADN group is idle. (N)
- 4.6 MADN (see above) – MULTIPLE CALL ARRANGEMENT – Allows a MADN member to pick up or originate a call without affecting the status of the other MCA group members.
- 4.7 MUSIC ON HOLD (CUSTOMER PROVIDED) - allows an incoming call holding on a Centrex station to receive music from a source provided by the customer. (N)
- 4.8 MUSIC ON HOLD (UTILITY PROVIDED) – allows an incoming call holding on a Centrex station to receive music while holding. The music is provided from the host central office.

CENTREX DEFINITIONS (continued)

- 4.9 PERMANENT HOLD – allows a station to hold one active call against its directory number without attendant assistance. When Permanent Hold is active, other calls cannot be originated or terminated and other features cannot be activated by either station.
- 5.0 PRESET CONFERENCE - allows a Meridian Digital Centrex station, trunk, or Attendant Console to establish a preset conference by dialing a specific directory number. When the preset conference number is dialed, the predefined directory numbers within or outside of the customer group are rung simultaneously. If a dialed number is busy or unanswered, a second number can be dialed if programmed. The conference call begins immediately when the first called parties join in.
- 5.1 QUERY TIME AND DATE – exhibits the current time and date on a business set display.
- 5.2 RING AGAIN – BUSINESS SETS – allows a Centrex business set user to monitor a busy directory number and notify the user when the called station becomes free. (N)
- 5.3 RING AGAIN – CUSTOMIZED – permits a Centrex user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling line are subsequently idle.
- 5.4 RING AGAIN – HUNT GROUPS – allows a Centrex user who encounters a busy station to be notified when the busy station becomes idle and to be automatically placed in a ring again mode.
- 5.5 SECONDARY DIRECTORY NUMBER – (SDN) – allows multiple numbers to be assigned to a Meridian business set. Each number is assigned to a key, and each SDN provides dial tone over the same cable pair as the primary number.
- 5.6 STATION MESSAGE DETAIL RECORDING (SMDR) DERIVED FROM AMA RECORD – allows for an AMA record to be produced if an originator of a call belongs to a Centrex customer group. (N)

Tariff Advice 326-19

CENTREX DEFINITION (continued)

- 5.7 SPEED CALL – allows an attendant to dial frequently dialed numbers by depressing a speed call key and dialing one or two digits instead of all digits in the number. The frequently dialed number may be a directory number, an authorization code, an account code or an access code. (L)
- 5.8 SPEED CALL – LONG LIST – allows a user to place calls to a previously designated list of frequently dialed numbers. This is achieved by dialing a Speed Calling Code plus an asterisk plus one or two digits instead of all digits of the desired number. The desired number may be a directory number, authorization code, account code or access code. The group long list has two digit codes and can be accessed by a number of users. However, only the controller can add to, change or delete numbers from the list.
- 5.9 SPEED CALLING – INDIVIDUAL SHORT LIST – allows a user to place calls to a previously designated list of frequently dialed numbers by dialing fewer digits than are in the regular directory number.
- 6.0 SPEED CALLING – BUSINESS SET ACTIVATED – allows a business set Centrex user to access up to three different speed call lists by pressing speed call keys or dialing access codes.
- 6.1 STATION MESSAGE DETAIL RECORDING (SMDR) – is an arrangement to provide a record, consisting of the calling number, the called number, date, time of day, duration of call and the type of facility used.
- 6.2 THREE WAY CONFERENCE / TRANSFER - allows a Centrex user to include a third party in a call and then to optionally transfer the call to the third party.
- 6.3 TRUNK QUEUING – CALL BACK QUEUING - allows a station user encountering an “all trunks busy” condition the option of being notified when a trunk becomes idle, and then being automatically connected to the called number. (L)

CENTREX DEFINITIONS (continued)

(L)

- 6.4 TRUNK QUEUING – AUTOMATIC ROUTE SELECTION – allows trunk route lists to be automatically searched in order to locate an idle outgoing trunk.
- 6.5 UNIFORM CALL DISTRIBUTION (UCD) – allows for an even distribution of incoming calls to a listed directory number over a group of Centrex business set stations. This group of stations is called an UCD group. Each station in the UCD group has its own directory number. The stations users can toggle their station's status (active/inactive) as an answering agent for the listed number.
- 6.6 VIRTUAL FACILITY GROUP (VFG) – defines the maximum number of simultaneously active incoming and outgoing calls a customer group is allowed (e.g. a typical VFG customer group may have 100 phones; however only 20 of these are allowed to simultaneously be active on outside calls).

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.1 Description of Service

A. General

1. Exchange service is available by means of facilities owned and maintained according to the Utility's standards. In certain exchanges extended area service (EAS) is furnished with availability of exchange service to other exchange areas of the Utility or of a connecting utility. Foreign exchange service from other exchanges of the Utility or connecting utilities is furnished in designated areas.
2. Toll service is furnished by means of lines of a connecting utility.

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.2 Interruptions and Failures of Service

A. Credit Allowance for Interruption of Service

1. Upon request of the customer, the Utility will allow credit in all cases where telephones are "out of service" except when the "out of service" is due to the fault of the customer, for periods of one day or more from the time the fact is reported by the customer, of an amount equal to the total monthly fixed charges for exchange service multiplied by the ratio of the number of days of "out of service" to the number of days in the billing month. For billing purposes each month is presumed to have thirty days.
2. A day "out of service" will be considered to exist when outgoing and/or incoming service is not available for a period of 24 hours. When any "out of service" period continues for a period in excess of an even multiple of 24 hours, the total period upon which to determine the credit allowance will be taken to the next higher even 24 hour multiple.
3. In no case will the credit allowance for any period exceed the total fixed charges for exchange service for that period.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.2 Interruptions and Failures of Service (cont'd)

B. Temporary Suspension for Repairs

1. The Utility shall have the right to make necessary repairs or changes in its facilities at any time and will have the right to suspend or interrupt service temporarily for the purpose of making necessary repairs or changes in its system. When such suspension or interruption of service of an appreciable period is necessary, the Utility will give the customers who may be affected reasonable notice thereof as circumstances will permit and will prosecute the work with reasonable diligence and, if practicable, at such times as will cause the least inconvenience to the customers.
2. When the Utility is repairing or changing its facilities, it shall take appropriate precautions to avoid unnecessary interruptions of conversations or customers' service.

C. Errors in Transmitting, Receiving, or Delivering Oral Messages by Telephone

The Utility shall not be liable for errors in transmitting, receiving or delivering oral messages by telephone over the lines of the Utility and connecting telephone utilities.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

1.0 **GENERAL REGULATIONS**

1.1 Undertaking of Telephone Company

1.1.3 **Liability and Obligation of the Utility**

A.. Utility's Liability and Obligation

1. Availability of Facilities

- a. The Utility's obligation to furnish exchange and toll service is dependent upon its ability to secure and retain without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary pole lines, circuits and equipment.
- b. The Utility, through its authorized employees, shall have the right of access to a customer's premises to install, remove, inspect or repair its line and equipment at any reasonable hour.

2. Interruptions of Service

If service is interrupted for more than twenty-four hours other than by negligence or willful act of the customer, an allowance at the minimum rate for the telephone facilities of the class of service affected at the time of the interruption shall be made for the time such interruption shall be made for the time such interruption continues, after notice and demand to the Utility. No allowance shall be made for a service interruption if a request for said allowance has not been received from the customer within sixty days of the service interruption. No other liability shall in any case be attached to the Utility on account of service interruption.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.3 Liability and Obligation of the Utility (continued)

A. Utility's Liability and Obligation (continued)

3. Directory Errors and Omissions

The Utility, except as provided, shall not be liable for damage claimed on account of errors in or omissions from its directories nor for the result of the publications of such errors in the directory nor will the Utility be a party to controversies arising between customer or others as a result of listings published in its directories.

4. Long Distance Service

The Utility acts as a billing agent for those telecommunications carriers with whom it has a billing and collection agreement, and will bill the customer for the long distance telephone calls submitted by such carriers. When, in its opinion, the Utility feels that excessive or flagrant use of long distance service is occurring, it may require the customer to increase his deposit. The Utility assumes no liability for errors in billings made by the telecommunications carriers for whom it acts as a billing agent.

(C)

(C)

5. Transmitting Messages

The Utility does not transmit messages but offers the use of its facilities for communications between patrons. If, because of transmission difficulties, the operator, in order to accommodate the customer, repeats messages, the operator is deemed to be acting as the agent of the persons involved and no liability shall be attached to the Utility because of any errors made by the operator or misunderstandings that may arise between customers because of the errors.

1.1.3 **Liability and Obligation of the Utility (cont'd)**

A.. Utility's Liability and Obligation (cont'd)

6. Connecting Company Facilities

When suitable arrangements can be made, lines of other telephone companies may be used in establishing wire connections to points not reached by this Utility's lines. In establishing connections with the lines of other companies, the Utility is not responsible or liable for any action of the connecting Company

7. Defacement of Premises

The Utility shall exercise due care in connection with all work done on the customer's premises. No liability shall attach to the Utility by reason of any defacement or damage to the subscriber's premises resulting from the existence of the Utility's apparatus and associated wiring on such premises, or by the installation or removal thereof, unless such defacement or damage is the result of the sole negligence of the Utility.

8. Adjustment of Charges

In the adjustment of charges for overbilling by the Utility, a refund will be rendered for the full amount, for a period not to exceed six (6) months.

1.1.4 Priority of Establishment and Supersedure of Service (cont'd)

B. Supersedure

An applicant who otherwise qualifies for the immediate establishment of service under this rule may supersede the service of a customer discontinuing that service when the applicant is to take service on the premises where that service is being rendered when a written notice to that effect from both the customer and applicant is presented to the Utility and where an arrangement acceptable to the Utility is made to pay outstanding charges against the service.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

1.0 **GENERAL REGULATIONS**

1.1 **Undertaking of Telephone Company**

1.1.5 **Service Connections and Facilities on Premises of Customer**

A. **Service Connections at Customer's Premises**

1. When underground service connections are desired by applicants or by customers in places where aerial drop wires would ordinarily be used to reach the applicant's or customer's premises, the Utility will, at its own expense, furnish the wire, except as stated in Section 1.1.5.A.2 below, and the trench shall be constructed and backfilled to the Utility's Standards and at the expense of the applicant or customer. The Utility will make all actual service connections.

Ownership of the facilities will be vested in the Utility and all necessary maintenance will be performed by the Utility.

2. Trailer court owners desiring underground service connections to units in the trailer court will be furnished the necessary wire by the Utility at the actual cost of the wire. Trenching shall be constructed and backfilled to the Utility's Standards at the expense of trailer court owners. The Utility will make all actual service connections.

Ownership of the facilities will be vested in the Utility and all necessary maintenance will be performed by the Utility.

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.5 Service Connections and Facilities on Premises of Customer (cont'd)

B. Use of Utility Provided Equipment on Customer's Premises

1. Equipment furnished by the Utility in connection with a customer's service shall be carefully used. |(C)
2. The customer will be responsible for loss or damage to any equipment or apparatus furnished by the Utility on his premises, unless such loss or damage is due to cause beyond his control.
3. No apparatus or device not provided by the Utility or authorized under Part 68 of the FCC rules shall be attached to or used in connection with telephone equipment and facilities provided by the Utility. The Utility shall have the right to disconnect service if unauthorized equipment is attached to Utility provided service.

C. Right of Access

1. The Utility's authorized employees may enter a customer's premise at all reasonable hours for any purpose reasonably pertinent to the furnishing of telephone service and the exercise of any and all rights secured to it by law or by the tariff schedules.
2. The Utility may remove any or all of its property located on the customer's premises at the termination of service as provided by the tariff schedules.

Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.1 **Undertaking of Telephone Company**

1.1.6 Telephone Directories, Listings and Numbers

A. Directory Listings

1. The Utility will enter listings of telephone numbers of its customers in its telephone directories with essential information whereby telephone users may ascertain the numbers of the desired telephone stations, as set forth in the tariff schedules.
2. The Utility will allow credit for errors and omissions in the listings of its customers in telephone directories:
 - a. When a listing is furnished at an additional charge in an alphabetical telephone directory. The credit allowance will be an amount not in excess of the charge for that listing during the effective life of the directory in which the error omission occurs.
3. The customer assumes full responsibility concerning the right to use any name as a directory listing and agrees to hold the Utility harmless of and from any claims, loss, damage, or liability which may result from the use of such listings. The Utility does not undertake to determine the legal, contractual or other right to the use of a name to be listed in a telephone directory of the Utility.

1740 S. Chugach Street
Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.1 **Undertaking of Telephone Company**

1.1.6 Telephone Directories, Listings and Numbers (cont'd)

B. Non-Published Numbers

1. A customer may request that the telephone number of his service not be published in the Utility's directories. If the customer shall make such a request, the Utility will take reasonable precautions not to publish the number in any of its publicly distributed directories,
 - a. Except when required by law, not to disclose the number to any person other than representatives of law enforcement agencies, its own employees or representatives, those of other telephone companies or other telephone customers who are billed for calls placed from non-published numbers.
2. The customer releases, indemnifies and holds harmless the Utility from any and all loss, claims, demands, suits or other action or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other person, caused or claimed to have been caused directly or indirectly by the publication of such number or the disclosure or nondisclosure of said number to any persons.

C. Non-Listed Telephone Numbers

A customer may request that the telephone number of his service not be published in the Utility's directory, but the number may be obtained by contacting "Directory Assistance".

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.1 Undertaking of Telephone Company

1.1.6 Telephone Directories, Listings and Numbers (cont'd)

D. Changes in Telephone Numbers

The assignment of a telephone number to a customer's telephone service will be made at the discretion of the Utility. The customer has no proprietary right in the number and the Utility will make such reasonable changes in telephone numbers and central office designations as the requirements of the service demand. The Utility will give the customer who may be affected by such changes in telephone numbers as reasonable notice thereof as circumstances will permit.

E. Notices Required by Law

1. Under provision of Alaska State Law (Sec. 11.45.035) every telephone directory published and distributed to the general public shall have the following notice:

WARNING:

Section 11.45.035. Illegal Use of Telephones. A person who anonymously telephones another person repeatedly for the purpose of annoying, molesting, abusing, through vile and obscene language, or harassing that person or his family, is guilty of a misdemeanor and, upon conviction is punishable by imprisonment in jail for not less than three months, not more than one year, or by a fine of not less than \$1,000, or both.

1.0 GENERAL REGULATIONS

1.1 **Undertaking of Telephone Company**

1.1.6 Telephone Directories, Listings and Numbers (cont'd)

E. Notices Required by Law (cont'd)

2. Alaska State Law makes it a punishable misdemeanor willfully to refuse to yield or surrender the use of a telephone party line to another person to enable such other person to report a fire or summon police, medical or other aid in case of emergency. The law also makes it a punishable misdemeanor to request the use of a party line on the pretext that an emergency exists, when the person requesting such use knows that no emergency exists. An "emergency" is defined as "a situation in which property or human life are in jeopardy and the prompt summoning of aid is essential."

1.0 GENERAL REGULATIONS

1.2 Obligations of the Customer

1.2.1 Establishing Service

(T)

A. General

1. The Utility requires each customer for telephone service to sign or approve verbally an opening of a service order for the service desired as a condition precedent to the initial establishment of service.

(C)

(D)

2. The service order will set forth the following information:

(T)

- a. Date and place of service order.
- b. Location of premises to be served.
- c. Date customer will be ready for service.
- d. Purpose for which service is to be used.
- e. Address for which bills are to be mailed or delivered.
- f. Service desired- class, type, and grade.
- g. Information for listing in alphabetical and classified phone directories.
- i. Such other information as the Utility may require.

(T)

(L)

(L)

3. The Utility may accept an oral or written service order from a customer for additions to, or changes in, the present service of the customer

(T, L)

4. Any service order is merely a request for service and does not in itself bind the Utility to furnish service except under reasonable conditions as set forth in the tariff schedules, nor does it bind the customer to take the service.

1.0 GENERAL REGULATIONS

1.2 **Obligations of the Customer**

1.2.2 Contracts

A. Conditions

Contracts will not be required as a condition to service except:

1. Where required by provisions contained in a filed rate schedule.
2. Where temporary service is to be furnished under Section 8.3, Temporary Service, in which case the term of the contract will be sufficient to cover the period of contemplated operations but not more than three years.
3. Where adequate tariff provisions for the service requested are not contained in a specific filed rate schedule.

1.2.3 Liability and Obligation of the Customer

A. The Customer's Liability and Obligation

1. Payment for Services and Facilities

The customer is required to pay for all charges for exchange service and facilities and toll messages. The customer is held responsible for all charges for telephone service rendered at this telephone, both exchange and toll, including charges for toll messages on which charges have been reversed. The customer should take all precautions necessary to properly supervise his telephone instrument to insure unauthorized calls are not made.

WARNING: SEC.11.61.120. HARASSMENT.

(A) A person commits the crime of harassment if, with intent to harass or annoy another person, that person:

1. Insults, taunts, or challenges another person in a manner likely to provoke an immediate violent response;
2. Telephones another and fails to terminate the connection with intent to impair the ability of that person to place or receive telephone calls;
3. Makes repeated telephone calls at extremely inconvenient hours;
4. Makes an anonymous or obscene telephone call or a telephone call that threatens physical injury;
5. Subjects another person to offensive physical contact; or
6. Violates a provision of an order issued under AS 25.35.010(b) or 25.35.020 restraining the respondent from communicating directly or indirectly with the petitioner

(B) Harassment is a class B misdemeanor.

1.0 GENERAL REGULATIONS

1.3 Use of Service

1.3.3 Use of Service

A. General

All services furnished by the Utility are solely for the legal use of the customer, his family and persons residing in his home, his employees or representatives.

B. Restrictions on Use of Service

1. Flat rate services are not installed on premises of a public or semipublic character in a location where the telephone would be accessible for use by the patrons of the customer or the public in general.
2. If it is found that the customer is sharing the use of his business service with an individual or concern, the Utility will hereafter require the customer to take regular service or joint user service as set forth in Section No. 2.2.3, Joint User Service.
3. If it is found that the customer is using his service for any illegal activity, the Utility shall have the right to immediately disconnect the customer's service.

Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.3 Use of Service

1.3.3 Use of Service (cont'd)

C. Conversation Limitations Concerning Party Line Service

It is understood that each party line customer will so use the service as not to interfere with the equitable proportionate use of service by other customers on the same line. When usage by one customer becomes so great that the other customers are not allowed their proportionate use of the line, the Utility has the right to require that the customer in question contract for a higher grade of service or discontinue service entirely.

1.4 Billing, Deposit and Credit Regulations

1.4.1 Billing Regulations

A. General

1. The customer is required to pay all charges for service provided by the Utility or by connecting utilities as provided in the tariff schedules contained herein or in any contract between the Utility and the customer.
2. The customer is responsible for all charges for telephone service rendered at his telephone, both exchange and toll, including toll charges which have been reversed.

1.0 GENERAL REGULATIONS

1.4 **Billing, Deposit and Credit Regulations**

1.4.1 Billing Regulations (cont'd)

B. Rendering of Bills

1. Billing Periods

- a. Regular bills for exchange and toll service will be rendered as nearly as practicable at regular intervals.
- b. When the period for which service is taken is less than the period of time normally contracted for, the total fixed charges will not be less than the minimum fixed charge for the particular service involved.

2. Regular Bills

- a. Bills for flat rate exchange service for the period specified in the tariff schedules may be rendered in advance and are payable in advance.
- b. Bills for toll service will be rendered in arrears and in general will be presented with the bills for exchange service. Where it appears necessary or advisable, toll bills may be rendered at more frequent intervals.

1.0 GENERAL REGULATIONS

1.4 Billing, Deposit and Credit Regulations

1.4.1 Billing Regulations (cont'd)

B. Rendering of Bills (cont'd)

3. Special Bills

The Utility may render a special bill for accumulated exchange and toll service charges at such time as the amount of unpaid charges, billed and unbilled, materially exceeds the amount of any prepaid charges or any deposits made in connection with the particular service. The Utility may also render special bills for exchange and toll service on a weekly or other periodic basis.

4. Computation of Bills

- a. Opening and closing bills, except those involving the minimum billing period, and bills for telephone service normally furnished on a monthly basis rendered for periods in excess of or less than a billing month will be prorated in the proportion of the number of days in the period involved to the number of calendar days in the billing month.
- b. Bills for telephone service normally furnished on an annual basis, except those involving the minimum billing period, rendered for periods of less than one year will be prorated on the basis of one-twelfth of the annual rate for each full month of service or fraction thereof.

1.4.1 Billing Regulations (cont'd)

B. Rendering of Bills (cont'd)

5. Back-billing and Refunds

The Utility may render a back bill or credit a refund to a customer for any erroneously billed or unbilled telephone service. Charges and/or credits will be computed from the date the error was discovered retroactively for a period not to exceed six (6) months.

C Payment of Bills

1. Payment of bills for telephone service should be made at the office of the Utility or to a duly authorized collector of the Utility. All charges for exchange and toll service are payable in lawful money of the United States only.
2. Regular bills, closing bills, special bills, bills rendered to persons discontinuing exchange service and bills for miscellaneous services are payable upon presentation. Service connection, installation, line extension charges, deposits, and advance payments for the establishment or re-establishment of credit or in conjunction with temporary service are payable before service is installed or restored. Charges for moves and changes are payable upon completion of the work.

| (L)

G. Long Distance Service

The Utility acts as the collection agency for certain interexchange carriers (through Billing and Collection Agreements) in billing for long distance telephone calls. When, in its opinion, the Utility feels that excessive or flagrant use of long distance telephone service is occurring, it may demand immediate payment of such service and/or require the customer to increase existing deposits, post a surety bond, or terminate the service. The Utility assumes no liability for errors in billing made by any non-Utility agency.

1740 S. Chugach Street
Palmer, AK 99645

1.0 GENERAL REGULATIONS

1.4 **Billing, Deposit and Credit Regulations**

1.4.2 Deposit and Credit Regulations

A. Deposits

1. Amount of Deposit

- a. The amount of deposit required for the purpose of establishing a customer's credit shall not exceed his estimated bill for exchange service and toll service for two billing periods, except where prior credit experience with the applicant indicates usage may be higher than estimated by the applicant. In that case the Utility may demand a higher than normal deposit.
- b. The Utility may require the customer to increase the amount of deposit at any time if, in its opinion, the charges billed against the subscriber are found to warrant such an increase.

2. Handling of Deposits

- a. A receipt in duplicate shall be issued for each deposit required herein, dated as of the date the deposit is made. The original receipt shall be delivered to the depositor and the copy thereof shall be retained in the Utility's file for at least six months after service to the depositor has been discontinued.
- b. If a customer becomes delinquent in the payment of his account, the Utility may apply the deposit on the delinquent account, provided the action is not taken prior to the date that such bill becomes delinquent.

1.4.2 Deposit and Credit Regulations (cont'd)

A. Deposits (cont'd)

2. Handling of Deposits (cont'd)

- c. After a customer's deposit, or a portion thereof, has been applied to the delinquent account, the customer, if notified to do so in writing by the Utility, shall redeposit an amount sufficient to raise his deposit account to the amount required in Section 1.4.2.A.1.a above.

3. Failure to Make a Deposit

- a. A customer, who receives a notice from the Utility to either establish a cash deposit or raise an existing deposit when all or a portion of a deposit has been applied to a delinquent bill, shall comply within five calendar days from the date of notification. If such notice is given orally, the Utility will follow up with a written notice confirming the conversation.
- b. Failure to comply with the Utility's deposit request, within the specified time limit, shall be grounds for the Utility to discontinue service on either a temporary or a permanent basis..

A. Deposits (cont'd)

5. Interest on Deposits

MTA will pay the interest rate of the interest bearing account in which the deposit has been placed, to any customer of record whose deposit is \$100 or more. Interest will be paid annually by credit to the next month's bill following the anniversary date or when service is discontinued by application to the final bill. Interest shall not accrue after a final bill has been rendered. If a delinquent account results in interruption of service, interest will not accrue on the account for twelve (12) months after re-establishment of service.

- 6.** After the customer has established a good payment record with MTA, the deposit shall be refunded along with any accrued interest when applicable. MTA may return a deposit at any time upon request if the customer's credit has been otherwise established as prescribed in B. following.

1.0 GENERAL REGULATIONS

1.4 **Billing, Deposit and Credit Regulations**

1.4.2 Deposit and Credit Regulations (cont'd)

A. Deposits (cont'd)

7. Deposit Refund Upon Cancellation of Application

When an application for telephone service has been cancelled prior to establishment of service, the deposit will be applied to any charges applicable in accordance with the tariff schedules and the excess portion of the deposit will be returned, and the applicant so advised.

8. Deposit Refund Upon Termination of Service

Upon termination of service for any cause whatsoever, the Utility will refund the customer's deposit or the balance in excess of unpaid bills for that service, and the customer so advised. The Utility retains the right to withhold all deposits pending receipt of incurred toll charges made at a time previous to the termination of service, but not for a period of more than sixty days.

B. Establishment of Credit

Each applicant for telephone will be required to establish credit, which will be deemed established upon qualifying under any of the following:

1. Telephone Service

- a. Applicant makes the cash deposit as prescribed in Section 1.4.2.A.1 preceding.

E. Alaska Universal Service Fund Surcharge

A. Applicability

The Alaska Universal Surcharge Fund (AUSF) Surcharge is a line item surcharge on intrastate end-user revenues to provide for payment to the Alaska Universal Service Fund. The Alaska Universal Service Fund provides:

1. Financial assistance, known as lifeline support to qualifying local exchange telephone companies so that bills of qualifying low income customers may be reduced; and,
2. Financial assistance known as dial equipment minute (DEM) weighting to local exchange companies of less than fifty-thousand (50,000) access line that qualify for assistance under the requirements set for by the Commission at 3 AAC 48.430; and,
3. Such other purposes as may be designated by the Commission by regulation.

B. Rates

The company concurs in the AUSF surcharge percentage set forth in the currently effective tariff of the Alaska Universal Service Administrative Company. A copy of the tariff of the Alaska Universal Service Fund Administrative Company is available for public inspection during normal business hours at 3380 "C" Street, Suite 201, Anchorage, Alaska 99503 or on the Alaska Universal Service Administrative Company's Web site at <http://www.ausac.org>

2.0 LOCAL ACCESS

| (L-1)

2.1 Local Access – Business and Residence

| (L-2)

2.1.2 Local Access – Residential Service

(N)

Refers to an access line provided at locations described in Section 1.3.1.C, Use of Service – Residential Rates.

Residential service includes:

- Single party service (unless facilities are unavailable)
- Touch-tone dialing
- Voice grade access to the public switched network
- Access to emergency services (including 911 and enhanced 911 where available)
- Access to operator services, interexchange carriers and directory assistance (except when blocked with a toll restriction)

2.1.3 Business Basic Service

Refers to an access line provided at the locations and for the purposes described in Section 1.3.1.B, Use of Service – Business rates.

Business Basic Service includes:

- Single party service (unless facilities are unavailable)
- Touch-tone dialing
- Voice grade access to the public switched network
- Access to emergency services (including 911 and enhanced 911 where available)
- Access to operator services, interexchange carriers and directory assistance (except when blocked with a toll restriction)

(N)

L-1 Material previously in Section 2.1.4, Individual and Party Line Access Service moved to Sheet 118.

L-2 Material previously in Section 2.1.5, Joint User Service, moved to Sheet 142.1.

2.0 LOCAL ACCESS

| (L-1)

2.1 Local Access – Business and Residence

2.1.4 Local Access – Business Deluxe

(N)

A. Description

Refers to an access line or trunk provided at the locations and for the purposes described in Section 1.3.1.B, Use of Service – Business rates

Business Deluxe service includes all the services provided for Business Basic service. In addition, a Business Deluxe customer may order, at no additional cost, any of the following features or services that are technically compatible from offices that are equipped with the service ordered.

(N)

B. Hunt Groups and Features

(L-2)

Line hunting provides a means of searching numbers to find an idle line. This service applies to a group of individual lines or to PBX trunks. Hunt group features are offered to customers subject to the availability of facilities and are subject to compatibility with other optional features.

Directory Number Hunting (DNH) – provides sequential hunting of hunt group numbers for an idle line when the main directory listed number is busy. Each line in this hunt group has its own unique directory number which allows direct calling and identifies toll calls. If the main directory listed number is not dialed, hunting begins with the number dialed and ends with the last number in the hunt group.

(L-2)

Circular Hunting (CIR) – is an enhancement to Directory Number Hunting allowing all lines in a hunt group to be hunted in sequential order regardless of the starting point. If the last number in the hunt group is busy, the feature returns to the pilot number and will continue until an idle line is located or to the hunt starting point.

(L-3)

(L-3)

L-1 Material previously in Section 2.1.5, Joint User, moved to Sheet 142.1.

2.0 LOCAL ACCESS

| (L-1)

2.1 **Local Access – Business and Residence**

2.1.4 Local Access – Business Deluxe (continued)

B. Hunt Groups and Features (continued)

(L-2)

Multi-Line Hunting (MLH) – is assigned to one directory number assigned to receive incoming calls for a group of lines. Hunting starts from the pilot number and hunts in a sequential manner to the last line in the group looking for an idle line. If none is found, the caller will receive a busy signal.

Bridged Night Number (BNN) – permits an additional 7-digit number to be assigned to a Multi-Line Hunt Group without any additional facilities. An incoming call on the bridged number is recognized by a lighted indicator other than the pilot number indicator.

Distributed Line Hunting (DLH) – allows rotation of the order in which incoming calls are processed. All incoming calls go first to the listed directory number. The feature will then route a call to the subsequent line that last received an incoming call. If this line is busy, Distributed Line Hunting will continue to hunt until it reaches an idle line or the hunt starting point resulting in a busy signal.

(L-2)

Line Hunt Overflow to a Directory Number (LOD) – is added to a Directory Number Hunting, Multi-Line Hunting, or Distributed Line Hunting group to allow calls to continue to another specified directory number on the customer's premise if all lines in the hunt group are busy.

(L-3)

(L-3)

L-1 Material previously located in Section 2.1.5, Joint User Service, moved to Sheet 142.2.

2.0 LOCAL ACCESS

2.1 Local Access – Business and Residence

2.1.4 Local Access – Business Deluxe (continued)

B. Hunt Groups (continued)

Line Hunt Overflow to a Route (LOR) – is added to a Directory Number Hunting, Multi-Line Hunting, or Distributed Line Hunting group to allow a call to be routed to another location or city when all lines in the hunt group are busy.

Stop Hunt (SHU) – is added to a Directory Number Hunting, Multi-Line Hunting or Distributed Line Hunting group. This feature provides cancellation or hunting activated by an external key at the customer's premise. The cancellation may be simultaneously assigned to one, several, or all lines within the hunt group.

Stop Hunt requires the customer to order an additional cable pair when requesting initial service for this feature. Cable pairs are billed on a 2-Wire Channel Termination basis from the serving wire center to the customer's location. (See Section 4.1 Special Access – Voice Grade). The external key at the customer's premises is a deregulated item and must be provided by the customer.

Call Forward Group – Don't Answer (CFGDA) A feature which provides Call Forward Group Don't Answer for all members of a directory number hunt group (DNH), a distributed line (DLH) group or a multilane (MLH) hunt group. CFGDA cannot be assigned to bridged night number (BNN) hunt groups.

2.0 LOCAL ACCESS

2.1 Local Access – Business and Residence

2.1.4 Local Access – Business Deluxe (continued)

C. Exchange Trunk Access Service

(C)

Business Deluxe service may be provisioned, at the customer's request, as an exchange trunk between a utility central office and a customer owned switching system. The trunk may be provisioned as two-way or one-way. Service may be furnished from any central office within the exchange area at the discretion of the Utility.

D. Direct Inward Dialing Service

Business Deluxe service may be provisioned, at the customer's request, as a one-way, direct inward dialing, exchange trunk where central office facilities and compatible number blocks are available.

(C)

Direct Inward Dialing Services include the central office equipment necessary for in dialing from the exchange and toll network directly to stations associated with compatible equipment.

(L-1)

The customer must subscribe to a number of trunks sufficient to insure service standards as determined by MTA.

The assignment of telephone numbers and the sequence of numbers assigned to this service are made at the discretion of MTA.

(L-1)

Business Deluxe includes only the DID trunk. Number groups must be ordered separately. Description of DID numbers is found in Section 3.3 separately.

2.0 LOCAL ACCESS

2.1 **Local Access – Business and Residence**

2.1.5 Local Access – Employee Rate

A. Applicability

Applicable to employee telephone service.

B. Conditions

1. The discounted rate treatment (Refer Section 5.2.1) is applicable to the residential access line charge only.
2. In certain instances where an employee's duties require that he be readily available to be called and where the Utility considers such service essential to the telephone company's operations, no charge is made for exchange service.
3. An employee's telephone which receives business service must be charged the regular, applicable rates as established in the tariff schedules.
4. An employee's telephone which has a non-published listing must be charged the regular, applicable rates as established in the tariff schedules.

2.1.7 Pay Telephone Access Line

| (T)

A. Description

A pay telephone access line will provide local dial tone service to any telephone instrument which has been made available to the public on a fee-per-call basis. The telephone instrument may be coin-operated, activated by calling collect, using a calling card or some other means. The pay telephone access line does not include central office coin signaling.

B. Conditions

1. Pay telephone access lines have the following network access: local and EAS, 411, 611, 911, 10xxx, 950, zero plus/zero minus and international. Pay telephone access lines will not have access to 900, pay-per-call, information service.
2. Pay telephone equipment must be registered under current FCC, Part 68 rules. Utility-provided equipment is grandfathered.
3. One pay telephone may be installed per line. Extension pay telephones are not permitted.
4. Pay telephone access lines will be terminated on a Utility-provided network interface device (NID). The Utility will provide grounding at the NID.
5. Pay telephone access lines will only be installed at the request of a payphone service provider who has been certificated by the Regulatory Commission of Alaska.

| (T)

C. Central Office Coin Supervision

Description

Central Office Coin Supervision provides the capability of central office line equipment to pass signals or tones from a pay telephone access line to the pay telephone service provider's (PSP's) designated operator service provider. The signal enables the operator service provider to recognize coin deposits and return coins to the pay telephone user. Central Office Coin Supervision also permits a suitably equipped operator service provider to automatically ring back the originating pay telephone access line upon completion of the call.

Conditions

1. Central Office Coin Service is provided at the request of a PSP that uses dumb pay telephones (instruments which require coin service signaling from the central office).
2. Central Office Coin Service is only provided in conjunction with a Pay Telephone Access Line (Tariff Section 2.1.7.A)
3. The PSP must designate an operator service provider.
4. The Utility shall not be liable for a shortage of coins deposited and/or collected from the pay telephone.

2.2 Directory Services

2.2.3 Joint User Service

A. General

Joint user service is an arrangement whereby an individual other than employee, member or officer of the business, which is the customer, shares in the use of another customer's business telephone service. | (T)

B. Applicability

Joint user service is applicable and is furnished upon application made by the customers as follows:

1. Application for the use of the customer's service by an individual, firm, company or association occupying jointly or in part the premises on which the primary service is located, or the premises on which the customer's off-premises service is located. In the case of individuals, firms, companies and associations engaged in the same business or profession, utilizing a common reception room with offices opening thereon or adjoining thereto, one of the numbers may become the customer and the remainder joint users.
2. Application for the use of the customer's service for another business separately conducted by the customer and differing in character or scope and in name from the business for which the facilities are furnished.

Palmer, AK 99645

2.0 LOCAL ACCESS

2.2 **Directory Services**

| (T)

2.2.3 Joint User Service (continued)

(L)

B. Applicability (cont'd)

3. Application for service to be furnished over the facilities utilized in furnishing service to the customer, in the name of another individual, firm, company, corporation or association represented by the customer and the use of the name to be listed is authorized by the owner of the name.
4. Whenever any individual member of a firm, company or association does not substantially participate in the earnings of his fellow members of such firm, company or association, then that fact shall be conclusive evidence that he is a joint user.

C. Restrictions

1. Joint user service is not available in connection with residential telephone service.
2. The customer's facilities are not to be extended off the premises on which primary service is located to furnish joint user service only.
3. The applicability of joint user service is determined by the obvious or actual use made of the service. The customer's facilities are not to be extended off the premises on which the primary service is located to furnish joint used service only.

(L) (T)

D Conditions

1. The rate for joint user service includes a listing in the telephone directory and applies in addition to the rates and charges for the facilities and all other services furnished.
2. The minimum charge for joint user service shall be the monthly rate; provided that if the listing is included in the telephone directory the charge will continue until the end of the directory period unless:
 - a. The joint user vacates the customer's premises,
 - b. The customer's service is discontinued,
 - c. The business for which the joint user service is furnished is discontinued at the customer's premises, and
 - d. The joint user becomes a customer to business service in the same exchange.

Tribal Lifeline and tribal Link Up Service support is available only to Qualifying low income customers residing on Tribal Lands. Tribal Lands are Defined in Subpart A of the regulations promulgated by the U.S. Dept of the Interior's Bureau of Indian Affairs (BIA). Tribal Lands include any Alaska Native village or regional or village corporation as defined or established Pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) which is Federally recognized as eligible by the U.S. Government for the special Programs and services provided by the Secretary of the Interior to Indians Because of their status as Indians. The entire state of Alaska is regarded as Reservation under BIA definition and is therefore considered "Tribal Land". 2. Lifeline provides eligible low-income subscribers a reduction in their monthly Local phone charges (local service, federal and state subscriber line charges). 3. Tribal Link Up covers 100% of new telecommunications service non-recurring connection fees up to \$100.00. The supported services under this section do not include the charges assessed for facilities or equipment that fall on the customer's side of the demarcation point, i.e. customer premises equipment and inside wiring charges. (T) 4. The customer may defer payment on up to \$200 of the above charges without interest for a person not to exceed one year. The deferred charges do not include any permissible security deposit required. Payment shall be equally paid over a twelve monthly period. If any payments are delayed, interest shall accrue from that date forward.

2.5 Telecommunications Service Priority (TSP)

(N)

TSP is a program that authorizes national security and emergency preparedness (NS/EP) organizations to receive priority treatment for vital voice and data circuits or other telecommunications services. Individuals or organizations must provide a TSP Authorization Code for each service for which they are requesting TSP designation.

A non-recurring TSP Level Implementation charge will apply when a request to assign or change a TSP level is received subsequent to the issuance of an order to install the service. (Reference 5.4.M.1)

A non-recurring TSP Level Implementation charge will not apply when TSP is discontinued or when ordered simultaneously with an order to install service.

A TSP recurring charge will apply to each service assigned a TSP level. (Reference 5.2.A.4)

Time and materials charges may be applicable when provisioning or restoring services with TSP and will be billed to the customer by the Company. (Reference 5.4 & 8.0)

When TSP priority provisioning is requested applicable non-recurring charges will apply, as well as a TSP Provisioning Charge. (Reference 5.4) TSP priority provisioning orders must include a TSP Authorization Code.

When a customer requests an audit or a reconciliation of the Company's TSP records, a TSP non-recurring charge will be applied. Additional labor rate charges, if applicable, will be billed to the customer by the Company. (Reference 5.4.M.3)

TSP's applicability is limited to those services which the Company can discreetly identify for priority provisioning and/or restoration.

3.0 GENERAL SERVICES

3.01 Centrex

A. Applicability

Applies to the service described in this section.

B. Territory

Centrex is available where facilities and conditions permit within the exchange areas of Eagle River, Chugiak, Palmer, Wasilla, Big Lake, Willow, Talkeetna, Tyonek and Cantwell.

(C)

C. General

Centrex is a central office based system that provides multiple features to multi-line business customers.

Centrex groups consist of a group of lines served by the same central office, and may include lines served from another central office. Subscribers in a Centrex group may dial each other directly using an abbreviated access code or may dial outgoing codes.

Centrex includes the following lines:

Main lines that connect the central office directly to the customer premise. Main lines in a Centrex group are served by the same central office.

Extension lines connect the station in a Centrex group that is served out of another central office, to the central office that serves the main lines.

3.0 GENERAL SERVICES

3.01 Centrex (cont'd)

D. Conditions

1. Customer premise equipment can be purchased or rented from MTA or provided by the customer. Customer provided equipment must be compatible with MTA's Centrex system. (C)
2. One primary service directory listing will be furnished for each Centrex line.
3. Wholesale customers may not aggregate multiple customers for the purpose of reselling Centrex as one customer group. This is not intended to limit retail customers who share office space, or single businesses with multiple offices, from being a single customer group. (N)

E. Types of Rates and Charges

There are two types of rates and charges. They are monthly rates and non-recurring charges. The rates and charges are described as follows:

Monthly Rates are recurring rates that apply for each month or fraction thereof that Centrex service is provided. For billing purposes, each month is considered to have 30 days.

Nonrecurring charges are one-time charges that apply for specific work activity (i.e. installation or change to an existing service). The types of non-recurring charges that apply for Centrex are programming of Centrex software group tables or changes to an existing group table. These charges are in addition to the applicable non-recurring service charges specified in Section 5.4 of this tariff.

Minimum period

The minimum billing period for Centrex service is 30 days.

(R)

H. Centrex Automatic Call Distribution (ACD)

Centrex ACD handles large volumes of incoming calls by distributing them equally among a group of answering agents. ACD permits tailoring of the service to the needs of an organization such as:

Overflow routing including overflow to a different ACD group, and then to a directory number, if unanswered;

Enhanced announcement options;

Offers features such as allowing the agent to enter the Not Ready state automatically by pressing a secondary DN key, allowing agents to park calls;

Provides call queuing and routing capabilities for call center operations;

Enables supervisory capability required to enable managers to supervise their ACD groups;

Offers unique night service treatments for each ACD group.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

3.0 GENERAL SERVICES

3.01 Centrex (cont'd)

I. Centrex Call Center Management Information System (CCMIS)

Centrex CCMI function enables a management information system (MIS) data stream from the ACD system to the customer-premises MIS processor via an X.25 link.

The CCMI functions enhance ACD by providing the following:

The customer has greater flexibility and control of their ACD environment, without having to involve telephone company central office personnel;

The customer has the ability to reconfigure parameters in their ACD configuration, such as queue size, recorded announcements, and agent assignments;

The customer has more accurate and more detailed reports such as walkaway code activities;

The customer has access to reports on agent call processing feature usage, including call hold, call transfer, call supervisor, and forceout.

3.1 Calling Features

| (T)

A. Applicability

Applicable to calling features as desired where service is provided by an electronic central office equipped with appropriate software.

(C)

|

(C)

B. Description

Anonymous Caller Rejection (ACRJ) allows subscribers with or without Caller I.D. to reject calls for which calling name and number have been intentionally blocked. Only calls for which the information has been blocked are rejected.

(L-1)

|

(L-1)

If the calling name/number is not available due to technical reasons, the receiving customer's equipment (if customer has Caller I.D.) shows a message indicating the unavailability of the calling information.

Rejected calls are sent to a recorded announcement provided by the telephone company. Anonymous Caller Rejection can be overridden by an operator in case of an emergency.

Automatic Line (AUL) allows a calling station, by going off hook, to be connected to a designated telephone number without dialing.

3.1 Calling Features (cont'd)

| (T)

B. Description (cont'd)

| (L-1)

Call Block – Per Call is automatically included with the provision of telephone service for all subscribers with line side connections in central offices which offer CALLER ID, Calling Number Delivery or Calling Name Delivery. A subscriber may designate their number (and name when available) as private and prevent delivery to a called party using Caller I.D., Calling Number Delivery or Calling Name Delivery on a per call basis by dialing an activation code. Normal delivery of calling information will resume on the next outgoing call.

(C)

Call Block – Per Line is a calling feature which, when added to the subscriber's line, will prevent delivery of the telephone number (and name when available) to a called party using Caller I.D., Calling Number Delivery, or Calling Name Delivery. Dialing an activation code will allow the calling number information to be sent for that call only.

(C)

Call Forwarding (CFW) allows the subscriber to "program" his line to forward incoming calls to another line.

3.0 GENERAL SERVICES

3.1 Calling Features (cont'd)

B. Description (cont'd)

Call Forward – Busy Line (CFB) forwards incoming calls to another (pre-designated) telephone number when the called number is busy.

Call Forward – Don't Answer (CFD) forwards all incoming calls to another (pre-designated) telephone number if the called number is not answered after a specified number of rings.

| (L)

Call Forward – Remote Access (CFRA) – A service which allows subscribers to activate or deactivate Basic Call Forwarding (included) or to change the forward-to destination when they are at a remote location. CFRA can be accessed from any touchtone (DTMF) telephone simply by dialing the access code and a personal identification number

Call Transfer (CXR) – A feature that allows a subscriber to instruct the switching equipment to transfer any incoming calls to a third party.

L – Material moved to Sheet 194.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

3.0 **GENERAL SERVICES**

3.1 **Calling Features (cont'd)**

| (T)

B. Description (cont'd)

| (L-1)

| (L-2)

Call Waiting (CWT) alerts the subscriber that he has another call waiting when he is already utilizing his telephone. By depressing the switch hook, the subscriber can put his first call on hold and answer the second call. The customer may include disable call waiting at no additional charge. Disable call waiting allows the subscriber to cancel the Call Waiting feature for the duration of one call by depressing the switch hook, dialing a designated code and depressing the switch hook once more. Disable Call Waiting is not available in the Cantwell, Clear or Tyonek exchanges.

(L-3)

| (C)

Call Waiting Display (CWD) displays the name/number associated with a call-waiting call immediately when the call arrives at the subscriber's line. Customers must have Caller I.D., or some form of call identification and Call Waiting in order for Call Waiting Display to work. Customer premise equipment with display capability is required to receive and display the incoming information. Call waiting display is not available in all areas.

(C)

3.0 **GENERAL SERVICES**

3.1 **Calling Features (cont'd)**

| (T)

B. Description (cont'd)

| (L-1)

| (L-2)

(L-3)

Caller I.D. displays the telephone number and name (when available) associated with an incoming call. After the first ring, the central office sends the number and name (when available) information of the calling party as well as the current month, day, hour and minute.

Calls from outside the Utility's service area or miscellaneous calls (including cellular) may be shown on display device as "Out of Area" or "Unknown Caller". If the calling party has designated the call as private (pursuant to Call Block Per Call or Per Line), the display device will show "Private Caller". Caller I.D. requires a telephone set or separate display unit capable of recognizing and displaying the incoming caller's name and telephone number.

Caller I.D. (see description of Caller I.D) with **Anonymous Call Reject** (see description) allows subscribers who decide to reject anonymous calls to take advantage of a package offering both features at a reduced rate.

Calling Name Delivery displays the name associated with the incoming call. The name is displayed after the first ringing cycle. Name display generally results in quicker recognition than number display and allows the customer to answer the call with a personalized greeting. With this service, the customer has more specific information upon which to base the decision to answer or not. The date and time of an incoming call is also displayed. Calling Name Delivery requires a telephone set or separate display unit capable of recognizing and displaying the incoming caller's name.

(L-3)

Palmer, AK 99645

3.0 **GENERAL SERVICES**

3.1 **Calling Features (cont'd)**

B. Description (cont'd)

Calling Number Delivery displays the 10-digit directory number of the calling party so that the customer can choose whether or not to answer the call. The calling number is displayed – on a telephone set or adjunct that is capable of displaying the incoming directory number after the first ringing cycle. Number recognition allows the subscriber to answer the call with a personalized greeting.

The date and time of the incoming call may also be displayed. This information is useful in conjunction with voice messaging because it allows the customer to know exactly when, and in what order, calls were received.

The Continuous Redial subscriber may direct the central office to place a call to the telephone number of the last outgoing call made from his/her telephone. The central office will redial the telephone number whether or not the original call was answered, unanswered, or busy. The feature is activated by dialing an activation code. If the redialed number is busy, the central office will attempt to complete the call.

When the line becomes available, the Continuous Redial subscriber will be signaled with a special ring. When the subscriber lifts the handset, the call will automatically be dialed. Continuous Redial may be billed on a monthly basis or per activation, depending on how the customer requests the services. Customers who have not subscribed to this service on a monthly basis will be charged two times the monthly rate rather than the per activation rate, after 15 activations during the month.

3.1 **Calling Features (cont'd)**

B. Description (cont'd)

The **Continuous Redial Block** (ACBB) will be provided free of charge, both recurring and non-recurring, when a subscriber requests denial of access to Continuous Redial.

| (C)

Customer Originated Trace (COT) allows customers who have been receiving harassing or prank calls to activate a trace of the last incoming call without requiring prior intervention by the police. Information about a traced call is made available to the subscriber's associated police agency, though not to the customer who initiated the trace. After a harassing or prank call is terminated, a customer who wishes to trace the call hangs up and immediately goes off-hook, receives dial tone and then dials the COT activation code, "57".

When the trace has been completed, the customer receives a COT success announcement with further instructions to contact their police department.

Customer Originated Trace will be billed to customers per activation.

3.1 **Calling Features (cont'd)**

B Description (cont'd)

Deny Origination (DOR) – A feature that prevents a line from originating calls. The line equipped with this feature may only receive calls.

Deny Termination (DTM) – A feature that prevents a line from receiving calls. The line equipped with this feature may only originate calls.

Intercept (INTC) routes a call to a recorded message which provides the new or changed number. Intercept will be offered outside MTA's serving areas, within the United States, only during the 60 day complimentary period when the subscriber provides the Utility with his/her new telephone number (C)

Intercept is available in Eagle River, Chugiak, Palmer, Wasilla, Big Lake, Willow, Talkeetna, and Cantwell. Intercept is not available in Tyonek, Healy, and Clear. (C)

The **Last Call Return** subscriber directs the central office to recall the telephone number of the last incoming call to his/her telephone by dialing an activation code. The subscriber can return a call without knowing the telephone number of the calling party. In connection with Last Call Return the Utility will deliver all numbers subject to technical limitations, including long distance. The central office will not recall numbers which have been designated private under the Call Block – Per Line or Per Call Feature.

The customer is responsible for toll charges incurred as a result of Last Call Return.

Last Call Return may be billed on a monthly basis or per activation, depending upon how the customer requests this service. Customers who have not subscribed to this service on a monthly basis will be charged two times the monthly rate, rather than the per activation rate, after 15 activations during the month.

3.1 **Calling Features (cont'd)**

B. Description (cont'd)

Last Call Return Block (ARB) will provided free of charge, both recurring and non-recurring, when a subscriber requests denial of access to Last Call Return.

| (C)

Multiple Simultaneous Call Forwarding (CFS) is an enhanced call forwarding option that will allow multiple calls to be forwarded concurrently through the telephone number to which the option has been assigned. The CFS option requires that the subscriber's line be equipped with call forwarding (Section 6.1.C). The maximum number of simultaneous calls is requested by the subscriber and must be matched by the same number of telephone lines on the terminating end. CFS is activated from the subscriber's telephone set.

CFS will not allow calls to be forwarded to a toll number. CFS is available in equipped central offices.

Personalized Ring (PRING) – Personalized ring allows a single-party line to be assigned multiple directory numbers (DNs). Depending upon the central office capability, subscribers may have one primary DN with up to three secondary DNs or one primary DN and one secondary DN. Incoming calls to separate DNs are identified by a distinctive ringing cadence. Subscribers may list all DNs in the directory; all billing is to the primary DN.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

3.0 GENERAL SERVICES

3.1 Calling Features (cont'd)

B. Description (cont'd)

Remote Call Forwarding (RCF) – A feature that allows a subscriber to have a local directory number in an MTA switching facility that automatically forwards calls to a station in another local calling area (remote station). The local directory number is transmitted to the remote directory number with the subscriber being billed for the forwarded portion of the call.

| (C)

Revertive Dialing (RDIAL) – allows the subscriber to dial his own number in order to ring extension phones with the same telephone number. Revertive Dialing is not available in the Cantwell and Tyonek exchanges.

Selective Call Accept (SCA) – allows the subscriber to store up to thirty-one telephone numbers from which the subscriber wishes to receive calls. An incoming call from a telephone number that is not on the SCA list will receive an announcement stating that the called party does not wish to receive the call.

Selective Call Forwarding (SCF) – allows subscribers to ensure that selected calls reach them when they are away from home or office. Incoming calls from up to thirty-one telephone numbers can be forwarded to another location.

Tariff Advice 289-19

3.0 **GENERAL SERVICES**

3.1 **Calling Features (cont'd)**

B. Description (cont'd)

Selective Call Reject (SCR) – allows the subscriber to selectively program a list of up to thirty-one telephone numbers from which calls are to be rejected or blocked. Incoming calls that are on the list are routed to an announcement informing the caller that the called party does not wish to receive the call.

Speed Calling (SC1) – allows the subscriber to dial telephone numbers utilizing a two or three digit code.

Three Way Calling (3WC) – enables the subscriber to set up a three-way conference call consisting of himself and two other parties.

Ring Anywhere – allows simultaneous incoming call notification to a user-defined group that consists of a primary directory number and up to four additional member directory numbers. The phone that goes off-hook first receives the call. Long distance charges, if applicable, will be billed to the primary directory number. (T)

The primary directory number must be a local access line purchased from Section 2.1.1, through 2.1.5 and Section 3.01. Group member number(s) are selected by the customer from telephone numbers in the North American Numbering Plan, subject to minor technical limitations. The subscriber can add, change, and delete member numbers on an as-needed basis. The subscriber also controls the activation or deactivation of the Ring Anywhere feature. (T)
In the active mode, all lines in the group will be notified of an incoming call. Deactivation of the feature will result in only in notification to the primary directory number.

C. Conditions

1. All charges and rates associated with Calling Features are in addition to those for the class, type and grade of service.
2. Calling Features will be provided only to the subscribers who have individual or trunk line service.

3.0 **GENERAL SERVICES**

3.1.1 **Toll Restriction Features**

A. Applicability

Applicable to toll restriction features as desired where service is provided by an electronic central office equipped with appropriate software.

B. Description

Directory Assistance Deny (DAD) prevents access to local and/or intrastate directory assistance. | (C)

Directory Assistance Deny and the Deny package are available in Eagle River, Chugiak, Palmer, Wasilla, Big Lake, Willow, Clear, Talkeetna and Healy. Directory Assistance Deny and the Deny package are available in Tyonek and Cantwell; however, they may not be combined with 900 denial.

International Blocking (IB) is a service that blocks all direct dialed international calls that use the call sequence 011+ or 101xxx-011+. IB is provided free of charge, both recurring and non-recurring.

Restrict Sent Paid (RSP) is a blocking feature which restricts 1+ calls other than 800 or local service. All 0+ calls are routed to the presubscribed IXC's operator services for service authorization and billing identification. RSP is not available in Tyonek or Cantwell. Additional IXC charges may apply.

Toll Deny (TDN) prevents access to the toll network for originating calls. The subscriber may receive incoming paid calls.

3.0 **GENERAL SERVICES**

3.3 **Digital Subscriber Service**

A. Description

Digital Subscriber Service (DSS) is a direct digital connection between MTA's switching network and a customer designated premise. The service will allow Direct Inward Dial (DID) and Direct Outward Dial (DOD) applications, one-way or two-way trunks, and foreign exchange (FX) service.

B. Conditions

1. Initial Service Order provisioning charges are to establish a digital access for a DS1 facility and the first digital trunk. | C

2. DSS trunks are provided over a high capacity (DS1) digital circuits at a speed of 1.544 Mbps.

3. The recurring and non-recurring charges for the high capacity (DS1) channel termination between MTA's central office and a customer designated premise are in Section 6.3 of this tariff. | T

4. Additional non-recurring charges, Section 7.4, may apply to requests for expediated service and/or changes made after the order has been placed.

5. Installation charges and non-recurring charges are waived if the customer signs a contract of one year or more and all local services are provided by MTA. | N

3.0 **GENERAL SERVICES**

3.3 **Digital Subscriber Services (cont'd)**

C. Volume and Term Discounts

(N)

1. The following discounts are available to Digital Subscriber Service customers who meet the volume and term requirements.
2. The discount will apply to the monthly recurring charges listed in Section 6.3.A and B.
3. Volume is based on the customer's number of DSS channel terminations.
4. If the customer chooses to disconnect all or a portion of the service prior to the expiration of the term discount period, discontinuance charges will apply to the portion of the service being disconnected. Discontinuance charges will equal one hundred percent of the total undiscounted monthly rates, less any amounts previously paid, for the period the service was discounted.
5. Discount Schedule:

DSS Channel Terminations

<u>Term</u>	<u>1 – 2</u>	<u>3 – 4</u>	<u>5 or more</u>
One Year	No discount	10%	15%
Three Year	10%	15%	20%
Five Year	15%	20%	25%

3.0 GENERAL SERVICES

3.4 Fire Reporting Service

A. Applicability

Applicable to fire reporting service.

B. Conditions

1. A fire reporting telephone system will be furnished under the provisions of this tariff to a fire protection district, a municipality or other governmental agency for use in transmitting reports of fires and other public emergencies and for the operation of public alarm signals.
2. The Utility's liability to the customer for this service or to any member of the public or to any third party for any failure of the system or any delay, interruptions, confusion or mistake in transmission of any message or signal or any consequence of the use, misuse or failure of the system or service shall be limited to an allowance for interruptions or failure of service as specified in Section 1.1.2, Interruptions and Failures of Service, of this tariff. In no event will the Utility be liable to the customer or any member of the public or any governmental body for any consequential damage arising from any of the foregoing.
3. Where a special type of fire reporting system service or facilities is furnished for a customer which is not specifically covered by this schedule the Utility will require a special agreement to be signed by the customer. This agreement will cover the special conditions related to the service, if any, its method of operation and liability clauses to protect the Utility, to the extent limiting its financial responsibility to the total charges applicable to the service and/or facilities provided.

3.5 **Integrated Services Digital Network (ISDN)**

(T)

3.5.1 **ISDN- Basic Rate Interface (BRI)**

(T)

A. Applicability

Applies to the service described in this section.

B. Territory

ISDN-BRI is available where facilities and conditions permit within the exchange areas of Eagle River, Chugiak, Palmer, Wasilla, Big Lake, Willow and Talkeetna.

(T)

|

(T)

C. General

ISDN-BRI is a digital architecture that provides an integrated voice/data capability to the customer premises facility, utilizing the public switched network. BRI distributes voice, data, image and facsimile. These serving arrangements conform to internationally developed, published and recognized standards generated by the International Telecommunications Union, (formerly CCITT) and the North American ISDN Users' Forum (NIUF), specifically Capability Package S (Refer to Bellcore Special Report - SR-3622 and SR-3480).

(T)

|

(T)

ISDN-BRI provides the customer two distinct B-channels on one pair of wires. The D channel is used by the Utility for network signaling.

| (T)

|

The B-channels will carry circuit-switched voice and/or data from the customer's premise to the central office.

(T)

3.5.1 ISDN- Basic Rate Interface (BRI) (cont'd)

(T)

C. General (continued)

Circuit switched voice allows the customer to originate and receive switched voice calls over a B channel

Circuit switched data allows the customer to originate and receive switched data calls over a B channel.

D. Conditions

1. National ISDN standards require that customers' provide an ISDN ordering code (IOC) when ordering service. An IOC is intended to provide customers with an easy-to-communicate term to order a specific set of ISDN services and features. An IOC is associated with specific equipment or applications and is generally provided by the vendor of the CPE. In addition the IOC indicates the specific set of technical switch translations necessary to provide the appropriate ISDN interface to customers. These translations are required to support the services and features of the CPE and by providing the IOC code to the Utility, service can be quickly and accurately provisioned.
2. B and D Channel Packet Service capabilities are not offered under this tariff.

E. Types of Rates and Charges

There are two types of rates and charges. They are monthly rates and nonrecurring charges. The rates and charges are described as follows:

Monthly Rates are recurring rates that apply for each month or fraction thereof that ISDN-BRI service is provided. For billing purposes, each month is a calendar month.

| (T)

The ISDN-BRI Basic Package includes 30 hours per month of combined usage (circuit switched voice and circuit switched data). Customers who exceed the maximum 30 hours of usage will be billed on a per B channel originating minute of use for additional time.

| (T)

3.5 **Integrated Services Digital Network (ISDN)**

(T)

3.5.1 **ISDN- Basic Rate Interface (BRI) (cont'd)**

(T)

E. Types of Rates and Charges (continued)

The Premium ISDN-BRI package includes 114 hours of combined usage (circuit switched voice and circuit switched data) per month. Customers who exceed the maximum usage will be billed per B channel originating minute of use basis for any excess minutes.

| (T)

The Unlimited ISDN-BRI package includes 341 or more hours of combined usage (circuit switched voice and circuit switched data) per month.

| (T)

Minutes of Use are charged monthly on Basic and Premium BRI packages when usage exceeds total hours of use included in the respective packages.

Nonrecurring Charges are one time charges that apply for specific work activity (i.e. installation or change to an existing service). The types of nonrecurring charges that apply for ISDN are engineering costs or central office translations time incurred when any customization is made to a ISDN-BRI package. These charges are in addition to the applicable non-recurring service charges specified in Section 5.4 of this tariff.

3.0 GENERAL SERVICES

3.5 Integrated Services Digital Network (ISDN)

3.5.2 ISDN- Primary Rate Interface (PRI) (cont'd)

C. General (continued)

PRI digital transport is provided over a DS1 link. The connection of 8 to 24 channel digital transport to the central office switch will provide one PRI service. Customers may subscribe to PRI Optional Features described in 3.5.3.F following: (C)

PRI provides up to 23 B-channels and 1 D-channel (23B+D) or up to 24 B-channels (24B). Up (20) 23B+D or 24B interfaces may be combined into a single PRI serving arrangement. (C)

PRI is for customers such as Internet Service Providers and PBX users who need larger access to the network. PRI is presented to the customer over a 4-wire interface with all channels, including the D-channel working at 64 kbps.

D. Service Configurations

1. 23B+D – This service configuration provides for 8 to 23 B-channels and 1 D-channel. The B channels carry the circuit-switched voice and data, while the D-channel handles signaling information. (C)

The B-channels may be provisioned on the same facility as the D-channel or on the other DS1 facilities.

2. 24B – This service configuration provides for 8 to 24 B-channels. The B-channels carry the circuit-switched voice and data information. The signaling information is provided by a D-channel one of the PRI facilities. (C)

3.5 **Integrated Services Digital Network (ISDN)**

3.5.2 **ISDN- Primary Rate Interface (PRI) (cont'd)**

D. Service Configuration (continued)

3. B-channel + Back-up D – This service configuration provides for B-channels and a backup D-channel. The back-up D-channel is used if the primary D-channel, which provides signaling for multiple PRI facilities, fails. All active calls are maintained during the switch-over to the back-up D channel.

(C)

E. Standard Features

All compatible standard and optional features are available to subscribers of PRI.

1. B-Channel Configuration – customers will specify how the B-channels will be configured.
2. Intra-serving Arrangement Calling Line Identification – allows delivery of the calling line identification only within a PRI serving arrangement.
3. Usage charges shall be applied to Data PRI originating calls.

F. Optional Features

1. Calling Name and Number Display

Requires suitably equipped ISDN switching and terminal equipment and allows the network to pass calling number and name information.

3.0 **GENERAL SERVICES**

3.5 **Integrated Services Digital Network (ISDN)**

3.5.2 **ISDN- Primary Rate Interface (PRI) (cont'd)**

F. Optional Features (continued)

2. Release Link Trunking

Provides the ability for the switch to release PRI trunks to and from a PBX that are no longer required as a result of a call that has been forwarded or transferred. At that time, the call is handled from the host central office while the PRI trunks are freed to accept new calls. The feature is provided subject to availability.

| (C)

3. Network Ring Again

This feature allows a calling station which encounters a busy signal to notify the central office switch to signal the calling station when the called station becomes idle. The calling station can then notify the switch to complete the call.

| (C)

4. Call by Call Service Selection

PBX connectivity with Call by Call Service Selection allows PBX users to gain trunking efficiencies by allowing several services over a single PRI. In contrast to non-ISDN trunks, PRI allows for Foreign Exchange (FX) facilities, tie trunks, INWATS, OUTWATS, and access to private networking capabilities. Rates for the non-ISDN trunks are in addition to PRI and will be quoted from the applicable tariff; i.e., Local, Intrastate or Interstate.

2. Volume and Term Discounts

Volume and term discounts are available to customers purchasing the Business Features Package. Customers who enroll in this plan are subject to the following conditions:

- a. These discounts apply to monthly recurring charges
(Reference Section 6.6.F.)

<u>Initial Term</u>	<u>One Year</u>	<u>Three Years</u>	<u>Five Years</u>
<u>Line Count</u>	<u>Discount</u>	<u>Discount</u>	<u>Discount</u>
1 – 7 lines	0%	5%	10%
8 – 19 lines	0%	10%	15%
20 – 99 lines	15%	20%	25%
100+ lines	N/A	N/A	36%

- b. Customers who discontinue their Business Features Package before the end of their contract period will be responsible to pay the difference between the month-to-month tariffed rates and the Term Discount rates. The additional billing will be calculated from the beginning date of the contract to the time of service cancellation.
- c. Business Features Package set-up fees (Reference Section 5.4.L) will be waived for those customers who choose a three-year or five-year term. If service is disconnected prior to the end of the term, waived set-up charges will be billed.
- d. Customers may combine Centrex lines with Business Features Package lines to calculate volume discounts. Combined lines must be billed to the same customer number but are not required to be billed on the same statement.

3.0 **GENERAL SERVICES**

3.9 **Gratuity Plan**

Description

- A. MTA may from time to time offer certain gratuities to customers designed to encourage these customers to initiate or maintain MTA service. These will be offered free of charge, and will not have a value greater than \$200 per gratuity. The gratuity will be limited to \$200 per line, per year.

3.10 **Telecommunications Service Priority (TSP)**

(N)

TSP is a program that authorizes national security and emergency preparedness (NS/EP) organizations to receive priority treatment for vital voice and data circuits or other telecommunications services. Individuals or organizations must provide a TSP Authorization Code for each service for which they are requesting TSP designation.

TSP non-recurring charges will apply when a request to assign or change a TSP level is received subsequent to the issuance of an order to install the service.
(Reference 6.10.A.1)

A TSP non-recurring charge will not apply when a TSP is discontinued or when ordered simultaneously with an order to install service.

A TSP recurring charge will apply to each service assigned a TSP level.
(Reference 6.10.B.1)

Time and materials charges may be applicable when provisioning or restoring services with TSP and will be billed to the customer by the Company.

When TSP priority provisioning is requested TSP non-recurring charges will apply, as applicable to non-TSP orders. (Reference 5.4) TSP priority provisioning orders must include a TSP Authorization Code.

When a customer requests an audit or a reconciliation of the Company's TSP records, a TSP non-recurring charge will be applied. Additional labor rate charges, if applicable, will be billed to the customer by the Company. (Reference 6.10.A.3)

TSP's applicability is limited to those services which the Company can discreetly identify for priority provisioning and/or restoration.

3.11 Number Reservation Option

- A. Customers who discontinue residential local exchange access service may choose a number reservation option to reserve a residential telephone number associated with the disconnected service (Refer Section 6.11). Number reservation option is not available for business lines, special circuits, or DID numbers.
- B. Customers may choose number reservation option for each disconnected number no more than once during any twelve consecutive months. If the customer has not activated local exchange service at the end of nine months using the reserved number, the number reservation will be removed.
- C. Number reservation option may be chosen for a period not less than one month and not more than nine months.
- D. At the time number reservation option is chosen, all bills rendered shall be paid in full.
- E. Rural radio subscribers, Section 2.1.6, are eligible for number reservation option.
- F. Customers choosing number reservation option must advise the Company at the time they place a disconnect request for the related telephone number.

4.0 SPECIAL ACCESS SERVICE

A. Description

Special access service is the furnishing of Utility facilities between customer designated premises for communications between specific locations. Special access service will not be connected with the Utility's exchange service lines except as set forth and described in applicable special access schedules. Special access service will be offered in the following types:

1. Voice Grade – a channel for the transmission of analog signals within an approximate bandwidth of 300 to 3000 Hz.
2. Digital Data – a channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 Kbps.
3. High Capacity – a channel for transmission of nominal 64 Kbps or 1.544, 3.152, 6.132, 44.736 or 274.176 Mbps isochronous serial data.
4. Wide Area Networks – Point to point or multi-point high speed transport service for the interconnection of Local Area Networks (LANs) and Wide Area Networks (WANs).

(N)

B. Territory

Special Access services will be provided within MTA's certificated service area where facilities are available.

C. Minimum Billing

The minimum billing period for Special Access service is thirty days unless noted under each specific service.

4.0 SPECIAL ACCESS SERVICE

| (D)

D. Conditions

1. Special Access channels are provided by metallic, fiber, radio carrier or a combination thereof at the option of the Utility. Metallic continuity or ground return channels are not guaranteed to be available. (L-1),(C)
(L-1)
2. Channels are furnished that are suitable for the specified purposes requested by the customer in a manner determined by the Utility. A channel, circuit or facility furnished by the Utility may be used only for the specified purpose primarily intended and may not be used for a combination of services. (L-2)
3. The rates as tarified apply to those areas in which the Utility currently has facilities. Special construction charges as covered in Section 8.1.D will apply where facilities do not exist. (L-2)
4. Local special access service is provided between two customer designated premises (CDPs) within local exchange boundaries. (N)
(N)
5. One channel termination (CT) charge applies per customer designated premise (CDP) (L-2)
6. A Channel Mileage Termination (CMT) charge will apply at the serving wire center for each customer designated premise (CDP) and/or Utility hub where the circuit is terminated.
7. Channel Mileage Facility (CMF) is measured using the intrastate V&H coordinates between two customer serving wire centers or a customer serving wire center and a Utility hub.
8. When the Channel Mileage Facility is zero, neither the CMF or CMT rate will apply. (L-2)

4.0 SPECIAL ACCESS SERVICE

E. Non-Recurring Charges

(D)

1. Non-recurring charges are intended to cover the cost of provisioning special access service.
2. In addition to the installation charge specific to each type of special access service, a Service Order Charge (Refer Section 2.3.D.1 and 5.4.A) will apply.

(L)

(L)

F. Components and Application of Non-Recurring Charges

(N)

1. Rush Installation – Special Access

A Rush Installation charge will be applied per order to requests for local special access, Direct Inward Dialing Number Arrangements (Section 3.2), Digital Subscriber Service (Section 3.3), and ISDN-PRI (Section 3.5.2) to be completed in a lesser period of time than normally quoted for installation.

2. Service Date Change Charge

A Service Date Change charge will apply, five or more working days after an order is placed, on a per order basis, for each service date changed. In addition to requests for local special access, this charge applies to Direct Inward Dialing Number Arrangements (Section 3.2), Digital Subscriber Service (Section 3.3) and ISDN-PRI (Section 3.5.2)

4.0 **SPECIAL ACCESS SERVICE**

| (L)

4.1 **Special Access – Voice Grade (cont'd)**

(C)

A. Description (cont'd)

4. Voice grade special access services are typically used for voice and voice band data applications. Typical examples of voice grade circuits are Foreign Exchange lines (station end only), multipoint private line, voice trunk type, two-point voice grade data (one way or simultaneous two way), multipoint voice grade data, and voice grade facsimile. These examples of applications are not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use.

B. Technical Specifications Packages and Network Channel Interfaces

Voice Grade service standards shall be in accordance with FCC standards as reflected in NECA's FCC Tariff 5, Section 7.

C. Optional Features and Functions

1. Central Office Bridging Capability

Voice/Data Bridging – two wire

Voice/Data Bridging – four wire

Special Access – Voice Grade (cont'd)

D.

Term Discounts

1. Term discounts are available to Voice Grade Service customers who meet the term requirements.
 - a. Customers who sign term commitments of 3 to 5 years obtain a discount of 15%. This discount increases to 20% for terms of 5 years or longer.
 - b. The discount applies to monthly recurring rates in this section.
 - c. Customers who discontinue their Voice Grade service before the end of the term commitment will be responsible to pay the difference between the month-to-month tariffed rates and the discounted rates. The additional billing will be calculated from the beginning date of the term commitment to the time of service cancellation. This includes any waived non-recurring charges.

4.0 **SPECIAL ACCESS SERVICE**

| (L-1)

4.2 **Special Access – Digital Data**

(L-2))

A. Description

A Digital Data channel is a channel for duplex four-wire transmission of synchronous serial data at the rate of 2.4, 4.8, 9.6, 19.2 or 56 kbps. The channel provides a synchronous service with timing provided by the Utility through the Utility's facilities to the customer in the received bit stream.

(L-2)

B. Conditions

(L-3)

1. The digital data point of demarcation is the RJ48S jack located at the customer's designated premises.
2. Digital data channels are provided between two customer designated premises or between a customer designated premise and a Utility hub where bridging functions are performed.
3. Digital Data service standards shall be in accordance with FCC standards as reflected in NECA's FCC tariff No. 5, Section 7.

(L-3)

C. Optional Features and Functions

(N)

1. Central Office Bridging Capability
 - a. Digital Data Bridging

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service

A. General

Frame Relay Service (FRS) is a medium-speed, connection-oriented packet-switched data service that allows for the interconnection of Local Area Networks (LANs) or other compatible end user customer premises equipment. The terminal equipment accumulates the customer data and puts it into a frame relay format suitable for transmission of the FRS network.

FRS permits customers to share network bandwidth for data transmissions.

Rates and charges for FRS are set forth in 7.5.A following.

| (T)

In addition to the regulations and charges specified in this section, the general regulations and charges specified in other sections of this tariff apply as appropriate.

B. Service Description

FRS is a transport service that facilitates the exchange of variable length information units (frames) between end user connections. Frames travel a fixed path through the network with an address that specifies the permanent virtual connection. Addresses are read by the network processor and the frames are relayed to the preassigned destination.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service (continued)

(T)

B. Service Description (continued)

The service includes: the Frame Relay Port Connection and the Permanent Virtual Connections (PVCs) which have associated Committed Information Rates (CIRs). A special access facility (ordered out of Section 7) is used to access the frame relay switch.

The Frame Relay Port connection permits FRS compatible end user customer premises equipment (CPE) to originate or terminate data to another end user within the FRS network. Connections between end user CPE and the telephone company frame relay switch are available at speeds of 56.0 kbps, 64.0 kbps, or 1.544 Mbps. Each Frame Relay Port connection requires the identification of a corresponding terminating port connection.

Connections are provided via Channel Terminations (see Section 7, Special Access Digital Data and High Capacity Services). All regulations, rates and charges as specified in Section 7 will apply in addition to the rates and charges associated with FRS.

PVCs are software defined, end-to-end, bi-directional communications paths that are established and dis-established via the service order process. While no physical circuits are dedicated, the two network addresses (one from each port connection) are connected electronically to form a PVC.

Tariff Advice 281-19

Effective January 1, 2002

Issue Date: January 16, 2001

Issued By: Matanuska Telephone Association, Inc.

By: _____

Title: Chief Executive Officer

Name: Greg Berberich

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service (continued)

(T)

B. Service Description (continued)

At the time service is ordered, the number of PVCs will be identified along with their Committed Information Rates (CIR). CIR is the bit rate at which the FRS network commits to transfer data. Committed Information Rates provide for frame relay switch throughput at designated speeds. This information is required for network routing purposes.

C. Conditions

A minimum of two FRS port connections are required for data to be transported between end users.

When placing an order for FRS, the end user customer must specify

- The number of Permanent Virtual Connections (PVCs) required;
- The location of the ports for each PVC;
- The Committed Information Rates (CIRs) that will be associated with each PVC.

When connecting to the port of another customer, the ordering customer must obtain authorization from the other customer.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service (continued)

(T)

C. Conditions (continued)

The Frame Relay Port is the physical location in the telephone company switching office where the special access facility of the customer connects to the FRS network. It receives the data frame from the end user customer's Local Area Network (LAN) or other compatible CPE device and verifies that the end user connection and the corresponding end user customer connection are valid before relaying the frame to the destination end point.

The Frame Relay Port consists of either a 56.0 kbps, 64.0 kbps, or a 1.544 Mbps port interface connection.

The Permanent Virtual Connection (PVC) is a software defined communications path between two port connections within the FRS network.

Each PVC is provisioned with a customer selected Committed Information Rate. The CIR is a transmission speed specified by the customer. CIRs range from 28 kbps to 768 kbps. The telephone company will provide switch capacity to permit the customer to transmit information with guaranteed delivery at speeds up to two times the CIR. Attempted transmissions at above two times the CIR will not be permitted.

1740 S. Chugach Street
Palmer, AK 99645

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service (continued)

(T)

C. Conditions (continued)

Customers will be permitted to order multiple PVCs on a given port subject to switch limitations. Customers anticipating non-simultaneous transmission may order CIRs assigned to these multiple PVCs, the sum of which may theoretically exceed the actual throughput of the port. However, when simultaneous transmission of multiple PVCs occurs, the total of the transmission rate (CIRs) may not exceed the actual throughput of the port.

D. Types of Rates and Charges

There are two types of rates and charges. They are monthly rates and nonrecurring charges. The rates and charges are described as follows:

(1) Monthly Rates are recurring rates that apply each month or fraction thereof that an FRS is provided. For billing purposes, each month is considered to have 30 days.

(2) Nonrecurring Charges are one-time charges that apply for specific work activity (i.e. installation or change to an existing service). The types of nonrecurring charges that apply for FRS are: installation of service and service rearrangements. These charges are in addition to the Service Order Charge as specified in Section 5 following.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

4.0 SPECIAL ACCESS SERVICE

4.4 Special Access , Frame Relay Access Service (continued)

(T)

D. Types of Rates and Charges (continued)

2. Nonrecurring Charges (continued)

(a) Installation of Service

Nonrecurring charges apply for the installation of PVCs.

(b) Service Rearrangements

Service Rearrangements are changes to existing (installed) services.

A PVC Rearrangement Charge will be applied whenever a change is made to the CIR of an existing PVC after initial port installation and/or a change is made to the terminating port destination of the PVC.

3. Minimum Period

The minimum period for FRS is one month and the full monthly rate will apply to the first month.

(T)

E. Term Discounts

Term Discounts are available to Frame Relay customers and apply to monthly recurring port charges and Permanent Virtual Circuit charges. Customers who enroll in this plan are subject to the following conditions:

(a) The customer must sign a contract for one, three or five years.

(i) One-year contract entitles the customer to a ten percent (10%) discount.

(ii) Three-year contract entitles the customer to a fifteen percent (15%) discount.

(iii) Five-year contract entitles the customer to a twenty percent (20%) discount.

(b) The Term Discount will begin on the first day of the next month after the customer has signed a contract for Frame Relay Term Discounts.

(c) Customers who discontinue their Frame Relay Service before the end of their contract period will be responsible to pay the difference between the month-to-month tariffed rates and the Term Discount rates. The additional billing will be calculated from the beginning date of the contract to the time of service cancellation.

8.0 SPECIAL CONSTRUCTION

8.1 Extension of Facilities

A. General Information

1. MTA will install service without construction charges to customers where existing facilities are available.
2. Definitions
 - a. Construction charges are non-recurring charges to customers to cover all or a portion of the costs involved to establish service where facilities are not available. These charges include line extension charges, special construction charges, etc.
 - b. Existing Facilities: Existing facilities are defined as the Utility's nearest distribution cable which is cable that terminates on a terminal block or at an encapsulation point. (C)
|
(C)
 - c. Line Extension Charge: As charge in excess of the Construction Allowance (CAP) which is the responsibility of the member. Line Extension Charges are assessed whenever aerial or underground outside plant telephone facilities are extended beyond existing facilities under normal construction or special construction conditions.
 - d. Normal Construction – Construction of aerial or underground outside plant telephone facilities along a cleared unobstructed route and the placement of facilities as determined by MTA.
 - e. Special Construction – Construction of aerial or underground outside plant telephone facilities under other than normal construction conditions. Special construction conditions may include the requirement to obtain private right-of-way easements, environmental studies, surveys, clearing, pre-ripping, special equipment or construction under extreme environmental conditions (including frozen ground).

8.0 SPECIAL CONSTRUCTION

8.1 Extension of Facilities (cont'd)

A. General Information (cont'd)

2. Definitions (cont'd)

- f. Special Construction Charges are charges assessed whenever aerial or underground outside plant telephone facilities are extended in other than normal construction conditions.

3. All extensions of facilities will be owned and maintained by MTA.
4. Deposits or advance payments covering construction charges are required at the time of application and are based on the estimated cost of the construction required.
5. Under unusual circumstances, customers may make special arrangements for payment by signing an agreement with MTA. Customers will be charged interest at the legal rate as prescribed in AS 45.45.010.
6. Where construction will not be within a utility strip or other designated right of way and where MTA requires adequate rights for the construction, operation and maintenance of such construction, the customer will provide MTA with easements, deed restrictions or other appropriate covenants for these rights as required by MTA.
7. Each member is entitled to a Construction Allowance, or CAP, which is the maximum amount the Utility will deduct from the Line Extension or Special Construction charges.
8. When calculating the amount owed by the member measurements will be made along the most advantageous route as determined by the engineer, between the closest existing facilities and the building in which the telephone is to be installed. (C)
(C)

Tariff Advice 228-19

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

8.0 SPECIAL CONSTRUCTION**8.1 Extension of Facilities (cont'd)****B. Conditions - General**

1. The rules and regulations contemplate usual construction, i.e. the type of construction MTA would provide for the area if the decision rested solely with it, or where required by law.
2. Customers requesting the extension of facilities will be provided construction cost estimates at the following cost:
 - a. One construction cost estimate will be provided at no charge to the customer. The customer will be required to pay an advance equal to \$100 for each additional construction cost estimate.
 - b. All advances received by MTA in payment of construction cost estimates will be potentially refundable. If, at the customer's request, construction does not begin within 1 year, advance payments are not refundable. If projects are cancelled within 1 year, advanced payments less any costs to MTA will be refunded.
3. When a charge is applicable for construction on the customer's private property, the customer may undertake such construction in lieu of the construction charges which apply to that portion. In all cases the customer must construct the facility in the most direct route to that portion of the property where service is to be located. The material furnished and the method of construction are subject to the approval of MTA and must adhere to MTA's installation specifications and the National Electrical Safety Code.

Tariff Advice 218-19

Effective September 13, 1996

Issue Date:

Issued By: Matanuska Telephone Association, Inc.

Matanuska Telephone Association, Inc.
1740 S. Chugach Street
Palmer, AK 99645

8.0 SPECIAL CONSTRUCTION

8.1 Extension of Facilities (cont'd)

B. Conditions – General (cont'd)

4. Any outside plant facility provided at the expense of the customer, on private property, is the property of MTA, and shall not be used by the customer for any purpose other than service furnished by MTA.
5. MTA is not liable for any defacement of or damage to the customer's premises resulting from the installation or removal of facilities when such defacement or damage is not the result of the negligence of MTA or its agents.
6. All advances received by MTA for payment of line extension or special construction charges, are potentially refundable advances.

C. Line Extension

1. The line extension charge will be obtained by measuring the most advantageous route, as determined by the engineer, between the closest existing facilities and the building in which the telephone is to be installed.
2. Line extension requests will be categorized as normal or special construction. Special construction costs, if applicable, will be added to the line extension charge.
3. Each member is entitled to one Construction Allowance (CAP) (Refer Section 5.4.H) per line extension request. A line extension request is further defined to mean the request for telecommunication service (undefined number of lines) from one member at a single location (legal piece of property). (T)

8.0 SPECIAL CONSTRUCTION

8.1 Extension of Facilities (cont'd)

C. Line Extension (cont'd)

3. Line extension charges, including service drops, are applicable whenever the cost to extend aerial or underground outside plant facilities beyond existing MTA facilities exceeds the amount of the CAP (Refer Section 5.4.H).
4. The line extension charge for members ordering between one and three lines under normal construction conditions will be calculated as follows: 1) the construction cost estimate (Refer Section 8.1.B.2 & 8.1.C.8) less 2) the construction allowance, or CAP (Refer Section 5.4.H) (C)
5. The line extension charge for members ordering between one and three lines under special construction conditions will be calculated as follows: 1) the construction cost estimate (Refer Section 8.1.B.2 & 8.1.C.8) less 2) the construction allowance or CAP (Refer Section 5.4.H). (C)
6. The line extension charge for members ordering four or more lines under normal construction conditions will be calculated as follows: 1) the construction cost estimate (Refer Section 8.1.B.2 & 8.1.C.8) prorated for the number of lines ordered by the member less 2) the construction allowance, or CAP (Refer Section 5.4.H). (C)
7. The line extension charge for members ordering four or more lines under special construction conditions will be calculated as follows: 1) the construction cost estimate (Refer Section 8.1.B.2 & 8.1.C.8) prorated for the number of lines ordered by the member less 2) the construction allowance or CAP (Refer Section 5.4.H). (C)

8.0 SPECIAL CONSTRUCTION

8.1 Extension of Facilities (cont'd)

C. Line Extension (cont'd)

8. If the actual costs of construction are less than the estimate, the difference will be refunded to the member. If the actual costs of construction are greater than the estimate, no additional money will be collected from the member.
9. The line extension charge paid to MTA will be refunded to the member (without interest) after five consecutive years of service at the location for which the line extension was paid.
10. The line extension refund shall not exceed \$5,000.
11. In no case will the amount of the refund exceed the amount originally paid.
12. Multiple members ordering a combined total of three lines or less to a single location (defined as a legal piece of property) will be offered the option of shared costs. If the shared costs option is selected, the multiple members will be eligible for a total of one construction allowance or CAP (Refer Section 5.4.H).
13. Shared costs will be calculated as follows: 1) the construction cost estimate (Refer Section 8.1.B.2 & 8.1.C.8) less 2) one construction allowance, or CAP (Refer Section 5.4.H) divided by 3) the number of members to result in a per-member cost. (C)

8.2 Precabbling Policy

A. Precabbling Policy for New Subdivisions

It is the policy of Matanuska Telephone Association, Inc. to require a Precabbling Application Fee in the amount of \$1,000.00 for processing the application.

1) Refundable Precabbling Application Fee

The Precabbling Application Fee may be refunded to the Developer if the following conditions are met:

- a) The subdivision has power installed prior to or at the same time as MTA's facilities.
- b) The subdivision is road accessible along current easements and right-of-ways to within 2,500 feet of existing MTA facilities.
- c) The Developer provides network infrastructure required by MTA, (trenches, poles, etc.)

The Precabbling Application Fee will be refunded upon completion of construction; provided the Developer has not defaulted on any of its obligations.

2) Aid-to-Construction and Reimbursement Plan

If the Precabbling Application does not qualify under (1), then MTA will develop a Cost Estimate. The Developer may then authorize MTA to proceed with construction, in which case the Developer must pre-pay the amount of the Cost Estimate.

Upon completion of construction, MTA will then determine the actual costs incurred. If the Cost Estimate is greater than the actual cost, MTA will reimburse the Developer the difference and the remaining funds will be disbursed according to the Reimbursement Plan in 8.2(A)(2)(a) below.

- a) Reimbursement Plan – The remaining amount may be refunded to the Developer over a five year period on a per-lot basis. The per-lot refund is determined by dividing the remaining refundable amounts by the number of lots in the subdivision. Eligible lots must have a permanent resident and connect to MTA local phone service. In the case of multi-family housing, 60% of the residents of each unit must connect to MTA local phone service. Refunds on eligible lots will be made on a semi-annual basis. Once the five year period expires, any unreimbursed lots will no longer qualify for a refund.

8.0 SPECIAL CONSTRUCTION

8.2 Precabbling Policy (continued)

D

B. Applicability

Applies to new subdivisions, additions to existing subdivisions, and replatting of existing areas.

C. Cabling Options

Through the negotiations with the subdivider, developer, or lot owners:

1. MTA will engineer and construct the project utilizing RUS-approved materials and specifications.
2. MTA will engineer the project and allow the Developer to construct the project as engineered, as long as the contractor selected by the Developer is fully qualified to perform the construction according to REA requirements, specifications, and all applicable codes.

8.0 **SPECIAL CONSTRUCTION**

8.2 **PreCabling Policy (cont'd)**

D. Ownership

Ownership of the cable will transfer to the Utility upon acceptance of final construction by MTA.

E. Exceptions

In cases where a lot owner requests service and no provisions or agreements are in effect between the Utility and the subdivider or developer, the Utility will, if required, compute a non-refundable Aid to Construction quote per Section 8.1, Line Extensions, of this Tariff.

F. Special Contract

Developer will be allowed to design and construct the subdivision's telephone pre-cabling project on an individual-case-basis subject to the terms and conditions of a special contract between the Developer and the Utility.

8.0 **SPECIAL CONSTRUCTION**

8.3 **Temporary Service**

A.. Establishment of Temporary Service

1. The Utility will, if no undue service impairment to its existing customers will result therefrom, furnish temporary service or service to speculative projects under the following conditions:
 - a. The applicant shall pay, in advance, or otherwise as required by the Utility, the estimated cost installed plus the estimated cost of removal, less the estimated salvage of the facilities necessary for furnishing service.
 - b. The applicant shall establish credit as required by Section 1.4.2, Deposit and Credit Regulations, except that the amount of deposit prescribed shall not exceed the estimated bill for the duration of service.
 - c. Prior to receiving service, the applicant shall enter an executed contractual arrangement as described in Section 1.2.2.A. (C)
|
(C)

B. Change to Permanent Status

1. If temporary telephone service is provided to a customer on a continuous basis for a period of 36 consecutive months from the date telephone service was first provided under this rule the service shall be classified as permanent and the payment made in excess of that required for permanent service shall be refunded.
2. If at any time the character of a customer's operations changes so that in the opinion of the Utility the customer's service may be classified as permanent, the amount of payment made in excess of that required for permanent service shall be refunded to the customer immediately.

8.0 SPECIAL CONSTRUCTION

8.3 Temporary Service (cont'd)

C. Refunds

1. The amount of refund upon reclassification of a customer's service from temporary to permanent will be made on the basis of the line extension schedule in effect at the time temporary service was first rendered to the customer or the present line extension schedule, whichever is less restrictive to the customer.
2. Total refunds shall not exceed the amount deposited and no interest shall be paid on the amount advanced, except for the amount of deposit made in accordance with Section 1.4.2, Deposit and Credit Regulations, to establish credit.

8.4 Winter Installation

(N)

A. Applicability

The Winter Installation Charge will apply to an order for service which is scheduled for installation after the ground has frozen.

B. Conditions

1. A winter installation will consist of the placement of high visibility drop wire on the ground from the nearest existing facility to the customer premise.
2. Before an order will be approved for winter installation, the route will be inspected by the Utility for possible safety hazards.
3. One winter installation charge will apply per customer location.
4. A winter installation is a temporary installation to provide permanent service. The Utility will replace the temporary drop wire with permanent buried drop wire when normal summer operations are resumed.

(N)

Matanuska Telephone Association, Inc.
1740 S. Chugach Street

9.0 UNIVERSAL SERVICE DISCOUNTS

9.1 Schools and Libraries

A. Conditions

1. Universal service discounts will be applied to all services provided for in Section 254 of the Telecommunications Act of 1996 that are provided under the jurisdiction of this tariff and through special contract.
2. Each year, the applicant must supply evidence to the Utility that the appropriate federal universal service funds are available by demonstrating the federal universal service fund administrator has committed the necessary funds.
3. The Utility will discontinue the applicant's universal service discounts and bill the undiscounted rate, if the applicant fails to approve the payment of universal service support to the Utility.
4. In order to receive universal service discounts, schools and libraries must meet the eligibility requirements set forth in section 47 CFR § 54.501.
5. Telecommunications services and network capacity provided to schools and libraries under this section may not be sold, resold, or otherwise transferred by such recipient in consideration for money or any other thing of value.
6. Any services supported by universal service discounts must be used for educational purposes only.
7. Schools and libraries receiving discounted service must maintain the appropriate records to assist in future audits.

9.0 **UNIVERSAL SERVICE DISCOUNTS**

9.1 **Schools and Libraries (cont'd)**

B. School & Library Discount Matrix

Pursuant to the Telecommunications Act of 1996 (47 U.S.C. 254 (h) (1) (B)) certain schools and libraries receive support under the definition of universal service. The discount matrix below is presented for calculating discounts to those qualifying entities.

School & Library Discount Matrix	Discount Levels	
% of students eligible for national school lunch program	Urban Discount	Rural Discount
< 1	20%	25%
1 – 19	40%	50%
20 – 34	50%	60%
35 – 49	60%	70%
50 – 74	80%	80%
75 - 100	90%	90%

Intrastate discounts shall be available only after January 1, 1998, and only if the discounts are solely funded through the federal Universal Service Program. Actual intrastate discounts may be lower than shown if federal funding is insufficient to cover the full discount. Details regarding the federal program and qualification for federal funding are found at 47 C.F.R. Part 54.
